A complete range of quality high force tools for all industrial applications, with local availability and after sale service anywhere in the world.... this is what has made Enerpac the undisputed global market leader in high pressure hydraulics.

Across every continent, Enerpac's network of authorized distributors and service centers can reach even the most remote locations, supplying and servicing products that are designed to enhance productivity and performance, while making the workplace safer.

With over 150 sales specialists and a network of service and engineering support in 17 countries across the globe, Enerpac has become the product of choice in industries such as manufacturing, construction, energy, oil & gas, shipbuilding, railroads, mining, and metals transformation.

Always at the leading edge of technology, Enerpac has continued to develop its range of time and cost-savings tools, utilizing modern engineered materials to improve productivity and minimize operator fatigue.

Enerpac's commitment to the continued development of quality high force tools ensures that the products you purchase are the best tools in the industry. We will continue to lead the way in the development of quality high force tools for all industrial applications.

Class Brand

10 Good Reasons to Work with Enerpac

- Expert Design
- Highly Reliable
- Service Excellence
- Worldwide Experience
- Application Support
- Availability
- Quality
- Value
- Innovative Products
- Systems Solutions

Total Quality

Our products are tested to the most exacting standards. These high standards guarantee the quality, price and performance requirements of the markets we serve around the globe.

Global Network

Enerpac has an extensive network of authorized distributors and service centers located in more than 90 countries worldwide. You can rely on Enerpac for the products and technical support you need to get your job done, anywhere in the world.

Logistics Excellence

Enerpac's mission is to maintain service excellence in the ever-changing world of modern distribution. Providing our extensive range of products to our thousands of distributors worldwide demands a logistic expertise only a market leader can provide.

A Tradition of Innovation

Enerpac has a long history of finding new solutions to better meet the challenges of the industries we serve. We were the first to develop a composite hand pump and the first to offer a computerized lifting system. Our latest innovations include a full range of aluminium cylinders.... cylinders with the strength of steel and the advantages of aluminium and the Z-Class series of power pumps.... pumps that were designed to run cooler, use less electricity and are easy to service.

And to support the demands of new technologies in the construction industry, Enerpac has continued to develop Integrated System capabilities. These capabilities will provide synchronized movement control for your most challenging applications.

ENERPAC

Hydraulic Technology Worldwide

Enerpac Hydraulic Cylinders

ENERPAC 
Hydraulic Technology Worldwide

ENERPAC hydraulic cylinders are available in hundreds of different configurations. Whatever the industrial application... lifting, pushing, pulling, bending, holding... whatever the force capacity, stroke length, or size restrictions... single- or double-acting, solid or hollow plunger, you can be sure that Enerpac has the cylinder to suit your high force application.

Enerpac cylinders fully comply to ASME B30.1.

Golden Ring Design

The exclusive Golden Ring Design is a unique bearing design which absorbs eccentric load stresses to protect your cylinder against abrasion, over-extending or plunger blow-outs and jamming or top-end mushrooming. As a result, Golden Ring cylinders provide long, trouble-free operation.

Hardened Saddle

prevents plunger from mushrooming and jamming in the top bearing. Snap-in design.

Plunger Wiper

reduces contamination, extending cylinder life.

Golden Ring

absorbs eccentric loading without galling cylinder parts.

Plated Plunger

resists wear and rust.

Golden Ring

absorbs eccentric loading without galling cylinder parts.

Plunger Return Spring

enables fast plunger retraction on single-acting cylinders.

Cylinder-Pump Sets

For your ordering convenience cylinders are available in **sets** (cylinder, gauge, couplers, hose and pump).

Page: 64

Note: The cut-away drawing is representative of typical cylinder construction, and may not represent all cylinders in this section.

Cylinder Section Overview

Capacity ¹⁾ ton (kN)	Stroke Range (mm)	Cylinder type and functions	Series	Page

RC-Series, Single-Acting Cylinders

ENERPAC 
Hydraulic Technology Worldwide

▼ From left to right: RC-506, RC-50, RC-2510, RC-154, RC-10010, RC-55, RC-1010

- Collar threads, plunger threads and base mounting holes enable easy fixturing (on most models)
- Designed for use in all positions
- Removable strap handles for unobstructed fixturing (RC-5013, RC-7513 and both 95 ton models)
- High strength alloy steel for durability
- Heavy duty return springs
- Baked enamel finish for increased corrosion resistance
- CR-400 coupler and dust cap included on all models
- Plunger wiper reduces contamination, extending cylinder life

▼ Stage lifting set up in Greece, where assembled pipes, 25 meters in length, were stage lifted with six RC-2514 cylinders.

The Industry Standard General Purpose Cylinder

Saddles

All RC cylinders are equipped with hardened removable grooved saddles. For tilt and flat saddles, see the RC-Series accessory page.

Page: 12

Base Plates

To ensure the stability of cylinders for lifting applications, base plates are available for 10, 25 and 50

ton RC cylinders.

Page: 12

Specialty Attachments

For solving all kinds of application problems, specialty attachments are available for 5, 10 and 25 ton RC cylinders.

Page: 168

▼ RC cylinder mounting attachments greatly extend the application possibilities (available for 5, 10, 15 and 25 ton cylinders).

Single-Acting, General Purpose Cylinders

Think Safety

Manufacturer's rating of load and stroke are maximum safe limits.

Good practice encourages using only 80% of these ratings.

▼ QUICK SELECTION CHART

The Enerpac Lightweight Aluminium Cylinders

▼ From left to right: RAC-5010, RACL-5010, RAC-1504, RAR-5010

- Lightweight, easy to carry and position to allow a higher cylinder capacity-to-weight-ratio
- Non-corrosive by design, aluminium has always been a good material for use in many caustic environments
- Composite Bearings on all moving surfaces guarantee NO metal-to-metal contact, to resist side loads and increase cylinder life

RAC, RACL, RACH, RAR Series

Capacity:

20-150 ton @ 700 bar

Stroke:

50-250 mm

Aluminium versus Steel

Aluminium cylinders, while offering the most lightweight solution, also have some unique limitations due to material properties. It differs from steel in that it has a lower finite fatigue life. Aluminium cylinders should NOT be used in high-cycle applications such as production. These cylinders are designed to provide 5000 cycles at their recommended pressure. **This limit should not be exceeded.** In normal lifting and many maintenance applications, this should provide a lifetime of use.

RAC-Series, Single-Acting, Cylinders

The lightweight general purpose spring return aluminium cylinders.

Page: 14

RACL-Series, Lock Nut, Cylinders

The lightweight spring return aluminium cylinders with lock nut for mechanical load

holding.

Page: 16

RACH-Series, Hollow Plunger Cylinders

For both push and pull forces with a single-acting cylinder.

Page: 18

RAR-Series, Double-Acting Cylinders

The lightweight aluminium cylinders for lifting and lowering.

Page: 20

RAC-Series, Single-Acting Aluminium Cylinders

ENERPAC 
Hydraulic Technology Worldwide

▼ Shown from left to right: RAC-5010, RAC-15010, RAC-304, RAC-208

- Composite bearings prevent metal-to-metal contact, increasing cylinder life and resistance to side-loads of up to 10%
- Hard-Coat finish on all surfaces resists damage and extends cylinder life
- Handles standard on all models
- Steel base plate and saddle for protection against load-induced damage
- Integral stop ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- High strength return spring for rapid cylinder retraction
- CR-400 coupler and dustcap included on all models
- All cylinders meet ASME B-30.1 and ISO 10100 standards

◀ The unique Enerpac RA-Series jacks – lightweight and entirely made of aluminium alloy – these RAC-506 jacks are ideal for the submergence and positioning procedure of tunnel elements at the bottom of the the rivers in the High Speed Train Line (HSL) project in Holland.

Lightweight for Maximum Portability

Saddles

All RAC-cylinders are equipped with bolt-on removable hardened steel saddles. For Tilt Saddles see

next page.

Page: **15**

Lightweight Hand Pumps

The Enerpac composite lightweight hand pumps P-392 or P-802 make the optimal lightweight set.

Page: **68**

Lock Nut Cylinders

When positive mechanical load holding is required, RACL-Series Aluminium Lock Nut Cylinders are the

ideal choice.

Page: **16**

t SELECTION CHART

▼ Shown from left to right: RACH-1504, RACH-15010, RACH-206, RACH-306

- Hollow plunger design allows for both pull and push forces
- Composite bearings prevent metal-to-metal contact, increasing cylinder life and resistance to side-loads of up to 10%
- Hard-Coat finish on all surfaces resists damage and extends cylinder life
- Floating center tube increases seal and product life
- Handles standard on all models
- Steel base plate and saddle for protection against load-induced damage
- Integral stop ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- High strength return spring for rapid cylinder retraction

◀ An RACH-306 powered by a P-392 hand pump used to extract corroded carriage pins of refuse collection vehicles.

The Lightweight Solution for Tensioning and Testing

Saddles

All RACH-cylinders are equipped with bolt-on hollow removable saddles of hardened steel.

Lightweight Hand Pumps

The Enerpac composite lightweight hand pumps P-392 or P-802 make the optimal lightweight set.

Page: **68**

Lifting an Unbalanced Load

When lifting an unbalanced load Enerpac Integrated Lifting Systems can be the solution with multiple lift point capabilities from 4 to 64 points.

* Note: Every RACH-cylinder is available with a stroke of 50, 100, 150, 200 and 250 mm.

Single-Acting, Aluminium Hollow Plunger Cylinders

Aluminium versus Steel

Aluminium cylinders, while offering the most lightweight solution, also have some unique limitations due to material properties. It differs from steel in that it has a lower finite fatigue life. Aluminium cylinders should NOT be used in high-cycle applications such as production.

These cylinders are designed to provide 5000 cycles at their recommended pressure. **This limit should not be exceeded.** In normal lifting and many maintenance applications, this should provide a lifetime of use.

RACH Series

Capacity:

20-100 ton

Stroke:

50-150 mm

Center Hole Diameter:

27-79 mm

Maximum Operating Pressure:

700 bar

Steel Base Plate Mounting Holes

The mounting holes in these aluminium cylinders are designed for fixturing the steel base plate. They will not withstand the capacity of the cylinder. The steel base plate protects the cylinder from damage and should not be removed.

CLP-Series, Pancake Lock Nut Cylinders

▼ Shown from left to right: CLP-2002, CLP-5002

- Extremely low height for use in confined areas
- Lock nut for positive and safe load holding over a long period of time
- Single-acting, load return
- Optional special synthetic coating for improved corrosion resistance and lower friction for smoother operation to withstand side load forces up to 3% of rated cylinder capacity without scoring
- Overflow port functions as a stroke limiter
- CR-400 coupler and dust cap included on all models

▼ Only the extreme low height CLP-cylinder fits in this confined area to lift the construction. The V-82 needle valve is used to control cylinder speed during lifting and lowering.

The Lowest Power Lifter

Tilt Saddles

All CLP-Series cylinders include integral tilt saddles with maximum tilt angles up to 5°.

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the

System Components Section for a full range of gauges.

RSM/RCS-Series, Low Height Cylinders

▼ Shown from left to right: RSM-1000, RSM-300, RSM-50, RCS-1002, RCS-302

RSM-series, Flat-Jac® Cylinders

- Compact, flat design for use where most other cylinders will not fit
- Single-acting, spring return
- RSM-750, 1000 and 1500 have handles for easy carrying
- Mounting holes permit easy fixturing
- Baked enamel finish for increased corrosion resistance
- CR-400 coupler and dust cap included on all models, except RSM-50 which is fitted with an AR-400 coupler.
- Hard chrome plated high quality steel plungers
- Grooved plunger ends require no saddle

RCS-series, Low Height Cylinders

- Lightweight, low profile design for use in confined spaces
- Single-acting, spring return
- Baked enamel finish for increased corrosion resistance
- Plunger wiper reduces contamination, extending cylinder life
- CR-400 coupler and dust cap included on all models
- Grooved plunger end with threaded holes for mounting tilt saddles
- Integral handle on RCS-1002 for easy carrying
- Plated steel plungers

Maximum Power-to-Height Ratio

Saddles

All RCS-Series cylinders have plunger mounting holes for installation of tilt saddles. See table for selection and dimensional information.

Page: 25

Lifting the first few millimeters

The LW-16 Lifting Wedge and SOH-Series Machine Lifts are the perfect choice

for lifting the first few millimeters.

Page: 172

▼ Only a couple of centimeters will do for an RSM-cylinder to lift a large construction. The V-82 needle valve is used to control cylinder speed during lifting and lowering.

For use with Subassemblies and Modules

Pump and Cylinder Sets

All cylinders marked with an * are available as **sets** (cylinder, gauge, couplers, hose and pump) for your ordering convenience.

Page: **64**

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the System Components Section for a full range of gauges.

Page: **119**

Attachments and Accessories

BRC-25 and BRC-46 units have base, collar and plunger threads to affix a range of optional attachments and accessories, such as chains, saddles and extension tubes.

Page: **168**

▼ To lift a load bearing mast into place, BRP-series cylinders were used to tension the supporting cables.

RCH-Series, Hollow Plunger Cylinders

▼ Shown from left to right: RCH-306, RCH-120, RCH-1003

- Hollow plunger design allows for both pull and push forces
- Single-acting, spring return
- Nickel-plated, floating center tube on models over 20 ton increases product life
- Baked enamel finish for increased corrosion resistance
- Collar threads for easy fixturing
- RCH-120 includes AR-630 coupler and has 1/4" NPTF port
- RCH-121 and RCH-1211 have FZ-1630 reducer and AR-630 coupler, all other models feature CR-400 coupler

▼ Hollow plunger cylinder RCH-1003 used in an application for intermediate boom suspension on a dragline.

Versatility in Testing, Maintenance and Tensioning Applications

Pump and Cylinder Sets

All cylinders marked with an * are available as **sets** (cylinder, gauge, couplers, hose and pump) for your ordering convenience.

Page: **64**

Ultra-Lightweight Aluminium Cylinders

If you need a higher cylinder capacity-to-weight-ratio the Ultra-lightweight **RACH-Series** are the perfect choice.

Page: **18**

Saddles

Most RCH-Series cylinders are equipped with smooth saddles. See table at next page for optional threaded

saddles and all dimensional information.

RRH-Series, Hollow Plunger Cylinders

▼ Shown from left to right: RRH-3010, RRH-1001, RRH-6010

- Relief valves prevent damage in case of over-pressurisation
- Baked enamel finish for increased corrosion resistance
- Collar threads enable easy fixturing (except RRH-1001 and RRH-1508)
- Double-acting version for fast retraction
- Nickel-plated, floating center tube increases product life
- Hollow plunger allows for both pull and push forces
- CR-400 coupler and dust cap included on all models
- Plunger wiper reduces contamination, extending cylinder life

Versatility in Testing, Maintenance and Tensioning Applications

Pump Selection

A double-acting cylinder must be powered by a pump with a 4-way valve.

Page: **67**

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the System Components Section for a full range of gauges.

Page: **119**

Saddles

All RRH-Series cylinders are equipped with smooth saddles. See table at next page for optional threaded saddles and all dimensional information.

Page: **31**

Golden Ring Design

Enerpac BRD-Cylinders are provided with the Golden Ring Design, for long, trouble-free performance.

- Designed for long life, the best choice for production applications
- Unique mounting configurations simplify fixturing
- Baked enamel finish for increased corrosion resistance
- Double-acting operation develops force in both directions, providing maximum versatility
- Plunger wiper reduces contamination, extending cylinder life
- Imperial models (RD-series) available on request

▼ Clamping application using Enerpac BRD cylinders (with clevis eye attachments on both ends) for their high pressure capability and mounting flexibility.

RR-Series, Double-Acting Cylinders

▼ Shown from left to right: RR-10013, RR-1502, RR-20013, RR-1010, RR-7513

- Collar threads, plunger threads and base mounting holes for easy fixturing (on most models)
- Baked enamel finish for increased corrosion resistance
- Removable hardened saddles protect plunger during lifting and pressing
- Built-in safety valve prevents accidental over-pressurization
- CR-400 couplers included on all models
- Plunger wiper reduces contamination, extending cylinder life

▼ These long stroke RR-cylinders are attached in a sliding and guiding system pulling the arched roof assembly of Athens Olympic Stadium step by step into the final position.

Most Versatile Performers

Rugged enough for the toughest job site uses and precision designed for high-cycle industrial uses

Saddles

RR-Series cylinders up to 75 ton have plunger mounting holes for installation of CAT-Series tilt saddles.

Page: **35**

Remote Lifting

For heavy lifting in remote locations use the Enerpac ZE-Series electric pumps.

A double-acting cylinder must be powered by a pump with a 4-way valve.

Page: **90**

▼ RR-cylinders provide power and precision in a special hydraulic press.

Double-Acting Long Stroke Cylinders

Cylinder retract capacity for certain RR cylinders may be less than theoretical values, as a result of reduced relief

valve pressure settings:
RR-308/3014: 275 bar
RR-506/5013/5020: 480 bar
RR-756/7513: 495 bar

▼ QUICK SELECTION CHART

For complete technical information see next page.

RR Series

Capacity:

10 - 520 ton

Stroke:

57-1219 mm

Maximum Operating Pressure:

700 bar

Enerpac CLRG-Series

If your application does not require high cycle, Enerpac CLRG-Series cylinders may be the right alternative.

Page: 46

Speed Chart

See the Enerpac Cylinder Speed Chart in our 'Yellow Pages' to determine your approximate cylinder speed.

Page: 117

Optional Snap-in Saddles

Optional snap-in saddles for RR-Series double-acting cylinders:

Saddle Type	Cylinder Model Number	Saddle Model Number
Flat	RR-1010, 1012	A-102F
Tilt	RR-1010, 1012	CAT-10
	RR-308, 3014	CAT-50
	RR-506, 5013 RR-5020, 756 RR-7513	CAT-100

Standard Saddles:

Grooved	RR-1010, 1012	A-102G
	RR-308, 3014	A-252G

For additional information on saddles:

Page: 12

RR-Series, Double-Acting Cylinders

RR-1010 - RR-3014

RR-506 - RR-50048

RR-1006 - RR-30048

No mounting holes on:
RR-506, 5013
RR-756, 7513
RR-1502, 15013

RR-4006 - RR-50048

Base mounting hole location is for reference only, as it is affected by assembly.

Cylinder retract capacity for certain RR cylinders may be less than theoretical values, as a result of reduced relief

valve pressure settings:

RR-308/3014: 275 bar

RR-506/5013/5020: 480 bar

RR-756/7513: 495 bar

Double-Acting Long Stroke Cylinders

Couplers Included!

CR-400 couplers included on all models. Fits all HC-Series hoses.

Capacity:

10 - 520 ton

Stroke:

57-1219 mm

Maximum Operating Pressure:

700 bar

CLSG-Series, High Tonnage Cylinders

ENERPAC 
Hydraulic Technology Worldwide

▼ Shown from left to right: CLSG-506, CLSG-5006, CLSG-4006

- Integral stop ring provides piston blow-out protection
- Baked enamel outside finish and plated pistons provide superior corrosion protection
- Unique bearing design withstands sideload forces up to 10% of rated cylinder capacity without scoring
- Interchangeable, hardened grooved saddles are standard
- Base mounting holes are standard on all models
- Plunger wiper reduces contamination, extending cylinder life
- Single-acting, load return

▼ Eight CLSG-2506 equipped with tilting saddles lifted the planking of the bridge as the pier heads were being rebuilt.

The Single-Acting Heavy Lifting Solution with Integral Stop Ring

Saddles

All CLSG-Series cylinders are equipped with bolt-on removable grooved saddles. For information on optional tilt saddles, see selection chart.

Page: **41**

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the

System Components Section for a full range of gauges.

Page: **119**

Remote Lifting

For heavy lifting in remote locations use the Enerpac ZE-series electric pumps.

Page: **90**

Low Height - High Tonnage

When low height with high force is required, CLP-Series Pancake Cylinders with lock-nut offer the solution to lift

the first few centimetres.

Page: **22**

Standard Features

- Interchangeable, hardened grooved saddles
- Top and side mounted lifting eyes
- CR-400 coupler and dustcap
- All cylinders meet ASME B-30.1 and ISO 10100 standards.

Single-Acting, High Tonnage Cylinders

▼ QUICK SELECTION CHART

CLSG Series

Capacity:

50-1000 ton

Stroke:

50 - 300 mm

Maximum Operating Pressure:

700 bar

Higher Capacities

1500 and 2000 ton models available on request.

Additional Stroke Lengths

Models above 150 ton are also available with standard stroke lengths of 100, 200 and 250 mm. Please contact Enerpac for ordering information.

Lifting an Unbalanced Load

When lifting an unbalanced load **Enerpac Integrated Lifting Systems** can be the solution with multiple lift point capabilities from 4 to 64 points. See our "Yellow Pages" for multi-cylinder set-ups.

Page: **54**

Optional features

To add optional features to your cylinders, add the following suffixes to the end of the model number.

Collar thread *

E002

* On 400 ton models and higher.

Example:

- For CLSG-5006 cylinder with collar thread, order: **CLSG-5006E002**

Technical specifications for these features are available from Enerpac.

CLSG-Series, High Tonnage Cylinders

Speed Chart

See the Enerpac Cylinder Speed Chart in our 'Yellow Pages' section.

Page: **117**

◀ For full features see previous page.

CLSG-502 - CLSG-15012

CLSG-2002 - CLSG-100012

Base Mounting Hole ¹⁾ Dimensions (mm)

- Lowest collapsed height for use in confined spaces
- Overflow port functions as a stroke limiter
- Plunger wiper reduces contamination, extending cylinder life
- Interchangeable, hardened grooved saddles are standard
- Special synthetic coating for improved corrosion resistance and lower friction for smoother operation
- CR-400 coupler and dust cap included on all models
- Single-acting, load return

▼ CLS-cylinders doing their job, synchronised lifting a complete fly-over for exact positioning.

The Single-Acting Heavy Lifting Solution With Reduced Collapsed Height

Saddles

All CLS cylinders are equipped with bolt-on removable grooved saddles. For information on optional tilt saddles, see selection chart.

Page: 45

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the System Components Section for a full range of gauges.

Page: 119

Remote Lifting

For heavy lifting in remote locations use the Enerpac ZE-Series electric pumps.

Page: 90

Low Height - High Tonnage

When low height with high force is required, CLP-Series Pancake Cylinders with lock-nut offer the solution to lift the first few centimetres.

Page: 22

Synchronous Lifting Systems

The solution for multiple lift point capabilities from 4 to 64 points.

Page: 54

Single-Acting, High Tonnage Cylinders

▼ QUICK SELECTION CHART

CLS Series

Capacity:

50-1000 ton

Stroke:

50 - 300 mm

Maximum Operating Pressure:

700 bar

Higher Capacities

1500 and 2000 ton models are available on request.

Additional Stroke Lengths

Models above 150 ton are also available with standard stroke lengths of 100, 200 and 250 mm. Please contact Enerpac for ordering information.

Lifting an Unbalanced Load?

See our 'Yellow Pages' for multi-cylinder set-ups.

Page: **113**

Optional features

To add optional features to your cylinders, add the following suffixes to the end of the model number.

Spring return

E001

Example:

- For CLS-5006 cylinder with spring return, order: **CLS-5006E001**

Technical specifications for these features are available from Enerpac.

CLRG-Series, High Tonnage Cylinders

▼ Shown from left to right: CLRG-506, CLRG-5006, CLRG-4006

- Double-acting, for push and pull
- Safety valve in retract side of cylinder helps to prevent damage in case of accidental over-pressurization
- Special bearing design withstands sideload forces up to 10% of rated cylinder capacity without scoring
- Plunger wiper reduces contamination, extending cylinder life
- CR-400 coupler and dust cap included on all models
- Baked enamel finish and plated pistons provide superior corrosion resistance

▼ CLRG-cylinders supported and positioned these automobile deck elements.

Double-Acting Power Lifters

Saddles

All CLRG cylinders are equipped with bolt-on removable grooved saddles. For information on optional tilt saddles, see selection chart.

Page: **49**

Safety Device

A pilot-operated check valve (V-42) can be inserted between cylinder and pump. This valve provides a safety

lock on the cylinder under load at any position and remote control for unlocking.

Page: **138**

Low Height - High Tonnage

When low height with high force is required, Pancake Cylinders with locknut offer the solution to lift the first

few centimetres.

Page: **22**

Standard Features

- Interchangeable, hardened grooved saddles
- Top and side mounted lifting eyes
- CR-400 coupler and dustcap
- All cylinders meet ASME B-30.1 and ISO 10100 standards.

▼ Replacing adjustment rolls under a fly-over with CLRG cylinders, for controlled lifting and lowering.

Double-Acting, High Tonnage Cylinders

RR-series

For loads below 50 ton Enerpac RR-series cylinders are a good alternative.

Page: 34

CLRG Series

Capacity:

50-1000 ton

Stroke:

50 - 300 mm

Maximum Operating Pressure:

700 bar

Pump Selection

A double-acting cylinder must be powered by a pump with a 4-way valve.

Page: 67

Higher Capacities

1500 and 2000 ton models are available on request.

Additional Stroke Lengths

Models above 150 ton are also available with standard stroke lengths of 100, 200 and 250 mm. Please contact Enerpac for ordering information.

Optional features

To add optional features to your cylinders, add the following suffixes to the end of the model number.

Collar thread *	E002
Plunger thread	E003
Collar * and plunger thread	E005

* On 400 ton and higher

Example:

- For CLRG-5006 cylinder with collar thread, order: **CLRG-5006E002**

Technical specifications for these features are available from Enerpac.

CLRG-Series, High Tonnage Cylinders

Speed Chart

See the Enerpac Cylinder Speed Chart in our 'Yellow Pages' section.

Page: **117**

◀ For full features see previous page.

CLL-Series, Lock Nut Cylinders

▼ Shown from left to right: CLL-5010, CLL-502, CLL-1006

- Single-acting, load return
- Safety Lock Nut for mechanical load holding
- Special synthetic coating for improved corrosion resistance and lower friction for smoother operation
- Withstands sideload forces up to 5% of rated cylinder capacity without scoring
- Overflow port functions as a stroke limiter
- Interchangeable, hardened grooved saddles are standard
- CR-400 coupler and dust cap included on all models

▼ For this curved bridge, CLL-cylinders were used to support the concrete beams, to level the pierhead and to place 4000 ton slide bearings between pier and pierhead.

To Secure Loads Mechanically

Saddles

All CLL cylinders are equipped with bolt-on removable grooved saddles. For information on optional

tilt saddles, see selection chart at next page.

Page: **53**

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the

System Components Section for a full range of gauges.

Page: **119**

Low Height - High Tonnage

When low height with high force is required, Pancake Cylinders with lock nut offer the solution to lift the first few centimetres.

Page: **22**

▼ CLL cylinder, mechanically locked, after positioning the curved bridge.

Single-Acting, Lock Nut Cylinders

▼ QUICK SELECTION CHART

CLL Series

Capacity:

50-1000 ton

Stroke:

50-300 mm

Maximum Operating Pressure:

700 bar

Higher Capacities

1500 and 2000 ton models are available on request.

Additional Stroke Lengths

Models above 150 ton are also available with standard stroke lengths of 100, 200 and 250 mm. Please contact Enerpac for ordering information.

Lifting an Unbalanced Load?

See our 'Yellow Pages' for multi-cylinder set-ups.

Page: **113**

Speed Chart

See the Cylinder Speed Chart in our 'Yellow Pages' section to determine the approximate cylinder speed.

Page: **117**

Optional features

To add optional features to your cylinders, add the following suffix to the end of the model number.

Spring return

E001

Example:

- For CLL-5006 cylinder with spring return, order: **CLL-5006E001**

Technical specifications for these features are available from Enerpac.

CLL-Series, Lock Nut Cylinders

Couplers Included!

CR-400 couplers included on all models. Fit all HC-Series hoses.

◀ For full features see previous page.

▼ Typical layout for a 4 points synchronous lifting system.

- 4 to 64 points, load and stroke monitored and controlled
- Capacities from 10 up to 1000 ton per lifting point
- Up to 1 mm accuracy over full plunger stroke
- PLC-control unit with user-friendly touch screen
- Automatic data storage and read-out for reporting and graphical representation
- System secured with warning and stop features to achieve optimal safety.

System Options:

- Load and force measurement
- Load cells for precise force measurement up to 0,1% of full scale
- Digital stroke sensors for:
 - up to 0,1 mm accuracy over full stroke
 - up to max. 1 km distance between control unit and lifting points
- Two-axis tilting control to level structures
- Oil heater or heat exchanger for extreme conditions.

Controlled Hydraulic Movement

Typical Synchronous Lifting Applications

- Bridge lifting and repositioning
- Bridge launching
- Lifting and lowering of heavy equipment
- Leveling of existing structures and buildings
- Structural testing
- Lifting and weighing of oil platforms
- Tunnel jacking and pushing.

See www.enerpac.com for more application information.

Heavy Lifting Cylinders

For a complete line of double-acting cylinders see the Enerpac Cylinder Overview.

Page:  7

▼ One of the world's first and largest lifting jobs for maintenance of a 3500 ton mining dragline was successfully done with an Enerpac synchronous hydraulic system: exact aligning of bearings on the rail on which this dragline rotates.

Multiple Points Synchronous Lift System

Typical layout for a 4 points synchronous lifting system.

SLS Series

Capacity Per Lifting Point:
10 - 1000 ton

Maximum Stroke:
5000 mm

Accuracy Over Full Stroke:
Up to 0,1 mm

Maximum Operating Pressure:
700 bar

◀ Bridge lifting and launching system. The load is balanced on groups of CLL-Series lock nut cylinders. The hydraulic lifting, launching and balancing movements are synchronized with PLC-control.

Contact Enerpac!

Contact your distributor or the Enerpac office nearest to you for advice and technical assistance in the layout of your ideal Lift System. You can also ask Enerpac for assistance by e-mail at info@enerpac.com.

▼ Enerpac synchronous lifting system with PLC-control unit used to lift temporary support towers during launching of the Millau Viaduct in France.

Basic & Premium System Management & Control Features

X = Standard, O = Optional

Features	Basic	Premium
Analog stroke sensors	X	X
Digital stroke sensors	—	O

Intercommunication capabilities	—	O
Sensor cables	X	X
Alarms	Basic	Premium
Stroke limitation	X	X
Load limitation	—	X
Low oil level	—	X
Oil filter warning	—	X
Oil temperature warning	—	X

▼ 250 ton Double-Acting Aluminium Stage-Lift Cylinder (with optional stroke sensor)

- Allows heavy duty lifting over long distances
- PLC-controlled synchronized stage-lifting
- Double-acting jacks with solid plunger design using Enerpac RAR, RR and CLRG-Series
- Double-acting jacks with hollow plunger design using Enerpac RRH-Series
- Lifting capacities from 10 to 1000 ton per lift point

Solution For Longer Distances

Stage-Lift Systems

Stage-Lift Systems overcome the usual limitation of lift height imposed by the cylinder's plunger stroke length. Large objects can be lifted, held and lowered for maintenance where other lifting methods are impractical.

Typical Stage-Lift Applications

- Tank jacking and lowering
- Lifting of buildings and structures
- Synchronized jacking
- Ship lifts

See www.enerpac.com for more application information.

Synchronous Systems

When lifting an unbalanced load Enerpac PLC-controlled Synchronous Systems can be the solution with multiple lift point capabilities from 4 to 64 points.

Page: **54**

▼ PLC-controlled hydraulic movement: Enerpac stage -lift systems lift and lower the umbrella deck on the world's largest concrete block builder with 0,01 mm accuracy, provided by 30 hydraulic climbing units in an integrated hydraulic system.

▼ Each climbing unit consists of two 70 tons double-acting cylinders and two 20 tons locking cylinders.

Double-Acting, Stage-Lift Systems

▼ This 55 meters long absorber was hydraulically lifted and lowered prior to transportation by ship. The Enerpac PLC-controlled stage-lift system was the ideal solution because the use of cranes was not possible.

▼ Horizontal stage-lift system: These long stroke RR-Series cylinders are attached to a sliding and guiding system, pulling the arched roof assembly of Athens Olympic Stadium step by step into the final position.

BLS SL Series

Capacity Per Lift Point:

10 - 1000 ton

Stroke Per Stage:

50-1219 mm

Maximum Operating Pressure:

700 bar

Contact Enerpac!

Contact your distributor or the Enerpac office nearest to you for advice and technical assistance in the layout of your ideal Lift System. You can also ask Enerpac for assistance by e-mail at info@enerpac.com.

To avoid overload situations, cylinders should be used within 80% of their maximum capacity.

Remote Lifting

For heavy lifting in remote locations use the Enerpac ZE-series electric pump.

Page: 90

Split Flow Pumps

Multi-cylinder arrangements can be powered and fully synchronised by Enerpac split-flow pumps.

Page: 96

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

Page: 120

Step 1

Step 2

Stage-Lifting Sequence

Step 1: The Stage-Lift cylinder is placed on a solid support under the load (retracted plunger).

Step 2: Plunger extends, lifting the load and giving clearance to insert two outer cribbing blocks under the spreading plate.

Step 3

Step 4

Step 3: Plunger retracts, giving clearance to position the central cribbing blocks which will support the plunger plate for the next extension.

Step 4: Plunger extends, lifting the load and giving clearance to insert two new cribbing blocks, placed crosswise under the spreading plate.

▼ 4 Points SyncHoist System positioning a steel roof segment

- High precision load manoeuvring, vertically and horizontally – using one crane
- Eliminates the risk of damage from oscillations of wire rope due to sudden crane starts/stops
- Vastly improving operating speed and worker safety
- Weather conditions play less critical role
- Intelligent hydraulics turn lifting into high accuracy hoisting and load positioning system
- High accuracy (+/- 1,0 mm)
- 700 bar double-acting push/pull cylinders with parachute valves for added safety in case of hose rupture or coupler damage
- Cost reduction when compared to conventional load positioning methods.

Three options for system management & control:

- Manual control: stroke control and system warning functions
- Extended manual control: stroke control, load and stroke display and system warning functions
- PLC-control: fully monitored system with programmable functions using touch screen and wireless remote control and system warning functions.

Turns Lifting with Crane into High Accuracy Hoisting and Load Positioning

Typical SyncHoist Functions and Applications

Functions

- High precision load positioning
- Pre-programmed positioning, tilting and aligning
- Counterweighing – determining centre of gravity

Applications

- Positioning of roof sections, concrete elements, steel structures
- Positioning of turbines, transformers, fuel rods
- Precise machinery loading, mill rod changes, bearing changes
- Precise positioning of pipe lines, blow out valves
- Positioning and aligning of ship segments prior to assembly

See www.enerpac.com for more application information.

Lifting an Unbalanced Load

Visit www.enerpac.com to learn more about SyncHoist.

Download the animation to see how it works step-by-step.

◀ The designs of Santiago Calatrava (architect) often require creative technological solutions. Enerpac SyncHoist System is one of them and was used for roof positioning of the Palace of the Arts in Valencia (Spain). Segments are hoisted from the ground, being positioned with four fully monitored cylinders.

SyncHoist - High Precision Load Positioning

Enerpac synchoist systems

System Load Capacity	240 ton	320 ton	440 ton
Max. handling load ¹⁾	4x60 ton	4x80 ton	4x110 ton
Number of lifting points ²⁾	4	4	4
System reach	1500 mm	1500 mm	1500 mm

Cylinder configuration

Push force @90 bar	10,5 ton	14,0 ton	22,0 ton
Pull force @700 bar	60,0 ton	80,0 ton	110,0 ton
Plunger stroke ²⁾	1500 mm	1500 mm	1500 mm

Pump single-stage

Oil flow at 700 bar	4,0 l/min	4,0 l/min	4,0 l/min
---------------------	-----------	-----------	-----------

Control options & system management ³⁾

Manual	option	option	option
Extended manual	option	option	option
PLC-control ⁴⁾	option	option	option

¹⁾ Subject to angle and position of lifting cylinders.

²⁾ Each cylinder equipped with parachute valve for added safety in event of hose/coupler damage.

Note: Enerpac SyncHoist have standard 4 lifting points. In the event that more or less lifting points are required, contact your local Enerpac representative.

³⁾ See chart below for detailed control features.

⁴⁾ Required for counterweighing (centre of gravity).

SHS Series

Capacity Per Lifting Point:

60 - 110 ton

Maximum Stroke:

1500 mm

Accuracy Over Full Stroke:

+/- 1,0 mm

Maximum Operating Pressure:

700 bar

▼ Roof lifting of the Auditorium at Tenerife at the Canary Island – Spain. A 4-points Enerpac hydraulic SyncHoist system is used for accurate roof positioning.

Three options for system management and control

Contact Enerpac for the following options.

1. Manual control

- Plunger stroke control
- System warnings for:
 - oil level, filter indication, thermal motor protection.

2. Extended manual control

- Plunger stroke control
- Load & stroke display
- System warnings for:
 - maximum cylinder load control setting
 - oil level, filter indication, thermal motor protection.

3. PLC-control

- Touch screen
- Remote wireless radio control
- Load and stroke monitoring
- Load calculations (centre of gravity)
- Pre-programmable motions and data recording
- System warnings for:
 - maximum cylinder load control setting
 - stroke and position control
 - oil level, filter indication, thermal motor protection.

Aluminium and Steel Jacks

▼ Shown from left to right: **JHA-73, JH-506**

JH/JHA Series

Capacity:
7-150 ton

Stroke:
76-155 mm

Maximum Operating Pressure:
700 bar

- Internal relief valve to prevent overloading
- Machined flat front and bottom surfaces permit flush alignment in tight corners
- Chrome plated plungers
- Pumping handle included
- All-directional operation on 7, 15 and 35 ton JHA-series
- Automatic by-pass port to prevent over-extension (JH-series)

Lifting Wedge and Machine Lifts

Ideal to lift the load the first few centimeters. The **LW-16** Lifting Wedge requires a very small access gap of only 10 mm.

Page: **172**

Load Skates

For moving heavy loads easily and safely.

Page: **174**

Style	Jack Capacity ton (kN)	Stroke (mm)	Model Number	Jack Effective Area (cm ²)	Collapsed Height (mm)	Extended Height (mm)	Bottom Plate Dimensions (W x L) (mm)	Plunger Diameter (mm)	Pump Speed	 (kg)

Steel Bottle Jacks

▼ Shown from left to right: EBJ-4GC, EBJ-50GC, EBJL-15GC, EBJ-12GC

EBJ Series

Capacity:

1,4-90,7 ton

Stroke:

77- 508 mm

Maximum Operating Pressure:

700 bar

Screw Feature

Heat treated, adjustable extension screw with cleated saddle on selected EBJ models helps adjusting and prevents slipping.

- Low handle effort reduces operator fatigue
- Fully serviceable
- Cast pump linkage and beam
- Pumping handle included on all models
- Safety relief valve to prevent overload
- Automatic bypass port to prevent over-extension
- Wiper seal for extended life
- Chrome plating on both plungers

Pump and Cylinder Sets

As an alternative to jacks where the operator is required to stand remote from the jacking point, see our range of pump-cylinder sets.

Cylinders

- Nickel-plated steel
- Viton® seals provide heat and chemical resistance
- Single-acting, spring return
- Collar thread, plunger thread and base mounting holes
- Plunger wiper reduces contamination, extends cylinder life

Hand Pumps

- Viton® seals provide heat and chemical resistance
- Anodized aluminium pump reservoirs and plastic encapsulated pump bodies
- Stainless steel pump pistons and inserts will not corrode or rust
- Second handle on P-142ALSS for two hand use
- Internal pressure relief valve for overload protection
- Handles lock for easy carrying

Pressure Relief and Check Valve

- Nickel-plated steel
- Viton® seals provide heat and chemical resistance
- Check valve V-66NV for load holding
- Pressure relief valve V-152NV limits pressure in hydraulic circuit

Solutions for maximum corrosion resistance in extreme environments

Applications

For use in wet environments such as food processing, pulp and paper, mining, construction and applications in high temperature or in welding areas.

Aluminium Cylinders

If you need a higher cylinder capacity-to-weight-ratio the lightweight **RAC-Series** are the perfect choice.

Page: **14**

Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

Page: **120**

Stainless Steel Gauge

Minimize the risk of overloading and ensure long, dependable service from your equipment. The alloy steel gauge **T6003L** is the perfect choice.

Enerpac Hydraulic Pumps

ENERPAC 
Hydraulic Technology Worldwide

ENERPAC hydraulic pumps are available in over 1000 different configurations.

Whatever your high-pressure pump needs are... speed, control, intermittent or heavy duty cycle you will find an Enerpac pump suited to the application.

Featuring Hand, Electric, Air and Gasoline powered models, with multiple reservoir and valve configurations, Enerpac offers the most comprehensive pump line available.

Pump Selection

For help in selecting the correct pump for your application, please review our 'Yellow Pages'.

If you require further assistance, contact the Enerpac office located near you.

P-Series, Lightweight Hand Pumps

▼ Pumps shown, from top to bottom: P-802, P-842, P-202, P-142

- Lightweight and compact design
- Durable glass-filled nylon reservoir and nylon encapsulated aluminium pump base for maximum corrosion resistance
- Two-speed operation reduces handle strokes by as much as 78% over single speed pumps
- Lower handle effort to minimize operator fatigue
- Integral 4-way valve on P-842 for operation of double-acting cylinders
- Handle lock and lightweight construction for easy carrying
- Large oil capacities to power a wide range of cylinders or tools
- Non-conductive fiberglass handle for operator safety
- Internal pressure relief valve for overload protection

▼ Cylinder-pump set SCR-254H used to support the construction while monitoring pressure and load with the gauge.

Exclusively from Enerpac

Cylinder Matching Chart

For help in selecting the correct hand pump for your application, please refer to the Cylinder Matching Chart located in the 'Yellow Pages'.

P-Series, Steel Hand Pumps

▼ Shown from top to bottom: P-462, P-84, P-801, P-77, P-80, P-39

- Two-speed operation for reduced operator fatigue (except P-39)
- 4-way valving on the P-84 and P-464 for operation of double-acting cylinders
- External load release valve on remaining models for single-acting cylinder operation
- Internal pressure relief valve for overload protection
- Large oil capacity to power a wide range of cylinders or tools

▼ In the absence of a power supply, the P-80 Hand Pump offers a powerful solution.

The Solution for Tough Jobs

Two Speed

Recommended for applications where cylinder plunger must advance rapidly to load contact, and applications where greater oil capacities are required, such as multiple cylinder hook-ups.

Foot Pump Conversion Kits

Convert your P-39 to foot power with the **PC-10** Kit. Includes instructions for easy conversion.

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the

System Components section for a full range of gauges.

Page: **119**

4-Way Control Valve

P-84 and P-464 feature a manual 4-way control valve, designed for use with one

double-acting or two single-acting cylinders. For system

MP-Series, Multifluid Hand Pumps

▼ Shown: **MP-110**

- Unbeatable corrosion resistance
- Standard supplied with Nitrile seals – can be used for a wide range of fluids such as demineralised water, oil/water emulsions, waterglycols, mineral oils
- Two speed pumps up to 1000 bar pressure
- Buna Nitrile seals can be exchanged with optional EPDM seal for use with Skydrol or brake fluids
- Impregnated aluminium anodized pump housing with stainless steel internal pumping components
- Externally adjustable pressure relief valve
- 1/4" NPTF gauge port.

t MP-Series pumps are ideal for testing and filling applications.

MP-Series Multifluid Pumps Typical Applications

- Filling and testing of aircraft systems such as shock absorbers
- Testing of aircraft systems using Skydrol fluid
- Testing of pressure vessels
- Operation of single-acting hydraulic tools and cylinders.

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment.

Page: **119**

Optional Reservoir Kit

The 10 litres reservoir kit **MP-10T** includes tank with skid frame, top plate with reservoir seal, suction pipe and mounting bolts. Useable oil capacity is 7,4 litres.

MP-110T

MP-110, 350, 700, 1000

	*	MP-1000	35	1000	52,60	2,20	45	26,5	6,6

Note: MP-Pump includes 1,5 mm thick gasket for reservoir mounting.
MP-Series pumps requires the use of an external reservoir.

Lightweight Hydraulic Foot Pump

▼ Shown: P-392FP

- Robust, durable and compact
 - Steel frame for maximum stability
 - Steel pumping handle
 - Aluminium reservoir
- Foot pedal lock and lightweight construction for easy carrying
- Two-speed operation reduces foot pedal strokes as much as 78% over one-speed pumps
- Controllable load return circuit for improved control under load and faster no-load retraction of spring or gravity return single-acting cylinders
- Large release valve foot pad for easy control for slowly metering loads down
- Internal pressure relief valve for overload protection.

Usable Oil Capacity (cm ³)	Model Number	Pressure Rating (bar)		Oil Displacement per Stroke (cm ³)		Max. Handle Effort (kg)	Piston Stroke (mm)	Piston Weight (kg)

2,47 cm³/stroke

Maximum Operating Pressure:

700 bar

Pump and Cylinder sets

The P-392FP is available as sets (pump, cylinder, gauge, couplers and hose) for your ordering convenience.

Page: 64

Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

Page: 120

t The great advantage of the P-392FP – easily operated by foot, making your hands free to handle the tool or cylinder.

P, 11-Series, Ultra-High Pressure Hand Pumps

ENERPAC 
Hydraulic Technology Worldwide

▼ Shown from left to right: 11-100, P-2282

- Two-speed operation on the P-2282 allows for faster fill operation, reducing cycle times for many testing applications
- 303 Stainless steel construction on the 11-100 and 11-400 models enable use with many different fluids, such as distilled water, diesters, silicones, soluble oils and petroleum
- Large release knob for improved control of pressure release
- Outlet ports are $\frac{3}{4}$ "-16 cone for 2800 bar rating
- $\frac{3}{8}$ " NPTF adaptor (partnr. C898.166) included with P-2282, for applications under 700 bar

Cone Seal

Stainless Steel High Pressure fittings seal on a 'cone' surface and do not require pipe sealer. The Gland Nut holds the sleeve and tubing tight against the cone surface to provide a 2800 bar seal.

Ultra-High Pressure up to 2800 bar

2-Way Shut-Off Valve 72-750

For 2800 bar applications requiring a shut-off valve or gauge snubber. Made of 318 Stainless Steel and

utilizing .38 inch cone fittings, it is the perfect selection for use with your Ultra-High Pressure hand pump.

Test System Gauges

Ideal for monitoring pressure in your hydraulic circuit, Test System Gauges, such as the T6010L, are available with

cone threads or NPT threads and a variety of pressure ranges.

Page: 130

PU-Series, Economy Electric Pumps

ENERPAC 
Hydraulic Technology Worldwide

▼ Shown: PUD-1300E

- Lightweight and compact design: 11,8 to 18,6 kg
- Large easy-carry handle for maximum portability
- Two-speed operation reduces cycle times for improved productivity
- 230 VAC 50/60-cycle universal motor will operate on voltages as low as 115 volts
- 24 VDC remote motor control, 3 m length for operator safety
- Starts under full load
- High strength molded shroud, with integral handle, protects motor from contamination and damage

▼ An Economy pump PUJ-1200E is used with an RC-2514 to reposition a stamping die to simplify maintenance.

Heavy on Performance, Light on Weight

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. For use with the Economy pump the following gauges are suggested:

For Pump Model Number	Gauge Model Number	Gauge Adaptor Model Nr.

	3,8	PUJ-1401E	13	700

* For 115 volt applications replace 'E' suffix with 'B'.

** Electric dump valve for auto-retract of cylinders.

Economy Electric Pumps

About the Economy Pump

The Economy pump is best suited to power small to medium size cylinders or hydraulic tools. Its lightweight and compact design make it ideal for applications which require easy transport of the pump. The universal motor works well on long extension cords or generator-driven electrical power supplies.

For further application assistance refer to the 'Yellow Pages'.

PUD-1100 Series

- Provides advance-retract of single-acting cylinders
- Ideal for punching applications
- For applications not requiring load holding
- 3 m pendant controls motor and valve operation.

PUD-1300 Series

- Provides advance-hold-retract of single-acting cylinders
- Ideal for punching applications
- For applications requiring remote valve operations
- 3 m pendant controls motor and valve operation.

PUJ Series

- Available with 3- and 4-way valves for single or double-acting cylinders
- 3 m pendant controls the motor operation
- Manual valves provide advance-hold-retract tool operation.

▼ Shown: PEJ-1401E

- Two-speed operation reduces cycle times for improved productivity
- Powerful 0,37 kW induction motor is submerged in the oil reservoir to run cooler, protect the motor, simplify the pump interface, save space and reduce noise
- Large 5,5 litres reservoir allows operation of a wide range of cylinders
- 24 VDC remote pendant control on certain models for safer operation
- Externally adjustable relief valve allows control of operating pressure without opening the pump
- 40-micron internal return line filter keeps oil clean, promoting longer pump life
- Full length side tube for easy monitoring of oil level

◀ The Remote Jog Model of the Submerged Pump simplifies repair on this construction crane.

Best Performance on Mid-Range Cylinders and Tools

▼ SELECTION CHART

For more technical information see next page.

5 BASIC PUMP TYPES

Select the model that suits your application. For special requirements see **page 83** or contact your Enerpac office.

PED Series: with Dump Valve

- Ideal for punching, crimping and cutting
- For use when load holding is not required
- Control pendant with 3 m cord controls valve and motor

PEM Series: with Manual Valve

- Ideal choice for most applications
- Manual valve control, for both single-acting and double-acting applications
- Manual motor control

PER Series: with Solenoid Valve

- Ideal for production and lifting
- All valves are 3 position for Advance-Hold-Retract
- Control pendant with 3 m cord for remote valve operation

PEJ Series: with Remote Jog

- For light production and lifting applications
- Manual valve control for single-acting or double-acting cylinders
- Control pendant with 3 m cord for remote motor operation

PES Series: with Pressure Switch

- Designed for continuous pressure applications, such as clamping, workholding and testing
- All versions include manual valves for directional control

* See the Valve Section in this catalog for technical information on valve types.

Submerged Electric Pumps

Submerged Pump Application

The Submerged pump is best suited to power small to medium size cylinders or hydraulic tools, or whenever quiet, intermittent duty cycle is needed. With its low sound level and the addition of the optional oil cooler, the Submerged pump is suited to light production work as well.

Its lightweight and compact design also make it ideal for applications which require some transport of the pump.

For further application assistance see the 'Yellow Pages' or contact your local Enerpac office.

Z-Class, Innovation in Pump Design

By reducing the number of moving parts, improving flow dynamics and decreasing friction, Z-Class pumps will stay on the job longer, require less energy to operate and when needed, have lower service costs.

Z-Class pump element – the heart of your hydraulic system

Highly efficient design provides increased flow rates, reduced heat generation and a decrease in power consumption. This means improved tool speed and increased service life – which results in higher productivity and lower operating costs.

Heavy-duty bearings extend pump life by reducing friction, reducing surface-loading and lowering bearing stresses.

Pump cavity oil bath extends pump life by reducing heat, improving lubrication and reducing wear.

Self-priming, high-flow 1st stage pump increases pump performance by super-charging the 2nd stage piston pump – improving oil flow in both hot and cold weather operation.

Balanced rotating components reduce vibration creating a smoother running pump – reducing wear, friction and sound levels.

Replaceable piston check-valves increase service life of major pump components.

Ergonomic and durable low-voltage pendant features sealed switches and operates on 15 Volts.

ZU4-Electric Pump

- For manual valve operation
- User adjustable relief valve on all valves
- Oil flow 1,0 l/min at 700 bar
- Skid Bar option (see page 88-89)
- Oil level sight glass or indicators
- Single phase electric motors include motor on/off switch and overload protection

ZU4-Electric Pump with LCD

- All the features of standard electric pump
- For manual and solenoid valve operation
- Back-lit LCD provides essential user information:
 - Pump usage information, hour and cycle counts
 - Low-voltage warning and recording
 - Self-test, diagnostic and read-out capabilities
 - Pressure read-out and auto-mode pressure settings (when used with optional pressure transducer)
- All options available (see page 88-89)

ZU4-Series Pump Applications

- **Portable:** when frequent pump transport is required and/or on remote locations
- **Universal motor:** 1-phase, runs well under poor voltage supply, using generator power supply or using long extension cord
- **Duty-cycle:** for intermittent applications
- **Cylinders & tools:** for medium to large size single- and double-acting applications and high speed.

Page: **86**

ZE-Series Pump Applications

- **Stationary:** when pump remains on one location
- **Induction motor:** 1 and 3-phase for high cycle usage
- **Duty-cycle:** for heavy-duty, extended cycle applications
- **Cylinders & tools:** for medium to large size single- and double-acting applications and high speed.

Page: **90**

▼ ZU4-SERIES PERFORMANCE CHART

	12,29	12,15	2,86	2,73	Two-stage				

* Oil flow will be approximately 6/5 of these values at 60 Hz.

i

Single or Two-Stage

Choose single-stage pumps for applications that require constant flow regardless of pressure such as testing or clamping. Two-stage pumps have an increased output flow at low pressure to allow fast movement towards the load, for reduced cycle times and increased productivity.

ZU4-Series, 700 Bar Electric Pumps

▼ Shown from left to right: ZU4108DE-T, ZU4420SE-H, ZU4304ME-K

- High-efficiency two-speed pump design – higher oil flow and bypass pressure, cooler running and requires 18% less current draw than comparable pumps
- Powerful 1,25 kW universal electric motor provides high power-to-weight ratio and excellent low-voltage operating characteristics
- High-strength, moulded composite shroud protects motor and electronics, while providing an ergonomic, non-conductive handle for easy transport
- Durable steel reservoirs
- LCD provides self test, diagnostic and read-out capabilities never before offered on a portable electric pump
- Designed to last and easy to service

◀ Designed to be tough, the ZU4-Series with steel reservoirs will take the abuse of today's construction sites. The ZU4908JE is the ideal pump for post tensioning applications. For post tensioning tools see page 182.

ZU4 CLASS

Tough, Dependable and Innovative

ZU4-Series Features and Options

For special requirements see factory installed features and options.

Page: **88**

▼ COMMON PUMP MODELS

For technical information and other options see next page.

BASIC PUMP TYPES

Select the model that suits your application. For special requirements contact your Enerpac office.

Dump Valve *)

- Ideal for punching, crimping and cutting.
- For use when load-holding is not required.

Manual Valve

- Ideal choice for most applications.
- Manual valve control, for single-acting or double-acting applications.
- Motor control on shroud.

Solenoid Valve *)

- Ideal for lifting applications and where remote control is required.
- Motor runs continuously on pumps with VE33 and VE43 valves. With VE32 valve, motor only runs during the advance function, while holding and retracting, the motor is off.

Manual Valve with Pendant *)

- For light production, lifting and post tensioning applications.
- Manual valve for single- or double-acting cylinders.
- Manual valve with power seat (VM43LPS), ideal for post-tensioning applications.

* Low-voltage control pendant with 3m. cord controls valve and motor.

ZU4-Series, Electric Pumps

ZU4-Series Pump Applications

The ZU4-Series pump is best suited to power medium to large size cylinders or hydraulic tools, or wherever high speed, intermittent duty cycle is needed.

Patent-pending **Z-Class** technology provides high by-pass pressures for increased productivity, specifically in applications using long hose runs and high-pressure drop circuits like heavy lifting or certain double-acting cylinders and tools.

Its lightweight and compact design make it ideal for applications which require easy transport of the pump. It utilises a universal motor which will work well on long extension cords or generator driven electrical power supplies.

For further application assistance contact your local Enerpac office.

ZU4 Series

¹⁾ All models meet CE safety requirements. "E" voltage versions also meet all requirements of the European EMC-Directive.

²⁾ See pages 133-137 for hydraulic symbol of these valves.

³⁾ See custom ordering matrix on page 89 for other voltage options.

⁴⁾ Subtract 1,4 kg. for STD Electric models.

Back-lit LCD ¹⁾

- Pump usage information, hour and cycle counts
- Low-voltage warning and recording
- Self-test and diagnostic capabilities
- Information can be displayed in six different languages ²⁾

¹⁾ Included on pumps with solenoid valves. Can be factory installed on pumps with manual valve.

²⁾ English, French, German, Italian, Spanish and Portuguese.

Pressure Transducer ³⁾

- More durable than analog gauges
- More accurate than analog gauges
- Calibration can be fine tuned for certification
- Easy-viewing variable rate display
- "Set pressure" feature turns off motor at user defined pressure ⁴⁾
- Display pressure in bar, MPa or psi

³⁾ Requires LCD Electric.

⁴⁾ Or shifts valve to neutral position on pump models with VE33 and VE43 solenoid valves.

ZU4-Series Features & Options

The LCD, Pressure Transducer and Heat Exchanger are factory installed features and cannot be ordered separately. The Skidbar can be installed by customer or ordered pump mounted from factory. Refer to pages 86-87 for selection chart and page 89 for ordering matrix.

Pressure Transducer

This pressure transducer is more durable against mechanical and hydraulic shock than analog gauges.

- Digital pressure read-out provides accuracy of 0,5% of full scale.
- Easy-viewing variable rate display automatically varies increments between 3, 14, 35 and 145 bar as rate of pressure change increases.
- "Set pressure" feature turns off motor at user defined pressure (or shifts valve to neutral on models with VE33 and VE43 solenoid valves).

Heat Exchanger ⁵⁾

- Removes heat from the bypass oil to provide cooler operation
- Stabilizes oil viscosity, increasing oil life and reduces wear of pump and other hydraulic components

⁵⁾ Requires LCD Electric. Heat Exchanger adds 4,1 kg to pump weight.

Skidbar ⁶⁾

- Provides easy two-hand lift
- Provides greater pump stability on soft or uneven surfaces
- Also available as kit (Modelnr. SBZ-4)

⁶⁾ 4 and 8 litres reservoirs only. Skidbar adds 2,2 kg to pump weight.

Heat Exchanger

Can be factory installed on ZU4-Series LCD Electric pumps.

- Extends system life.
- Stabilizes oil temperature at a maximum of 54 °C at 21 °C ambient temperature.

Do not exceed maximum oil flow and pressure ratings. Heat exchanger is not suitable for water-glycol or high water based fluids.

Thermal Transfer *		Maximum pressure	Maximum oil flow	Voltage
Btu/h	kJoule	(bar)	(l/min)	(VDC)
900	950	20,7	26,5	12

* At 1,9 l/min at 21 °C ambient temperature.

ZU4-Series, Dimensions & Ordering Matrix

ZU4-Series with 4 and 8 litres reservoirs

ZU4-Series with 10, 20 and 40 litres reservoirs (left view shown without side handle)

ZU4 Dimensions (mm)					
	Reservoir Size (liter)				
	4	8	10	20	40
A	432	495	447	472	559
B	142	203	155	180	270

3 Flow Group

4 = 1,0 l/min @700 bar

4 Valve Type

(see page 133-137 for valve details)

- 1** = Dump **VE32D**
- 2** = 3-way, 2-pos. manual **VM32** or electric **VE32**
- 3** = 3 way, 3 pos. manual **VM33** or electric **VE33**
- 4** = 4 way, 3 pos. manual **VM43** or electric **VE43**
- 6** = 3 way, 3 pos. manual locking valve **VM33-L** with pilot operated check.
- 8** = 4 way, 3 pos. manual locking valve **VM43-L** with pilot operated check.

5 Reservoir Size

(usable oil capacity)

- 04** = 4 litres
08 = 8 litres
10 = 10 litres¹⁾
20 = 20 litres¹⁾
40 = 40 litres¹⁾
¹⁾ reservoir includes side handles.

6 Valve Operation

- D** = Dump (solenoid valve with pendant and LCD Electric)
J = Jog (manual valve with pendant and Standard Electric i.e. without LCD)
K = Jog (manual valve with pendant and LCD Electric)
L = Manual valve with LCD Electric (without pendant)
M = Manual valve with Standard Electric (i.e. without LCD, without pendant)
S = Solenoid valve with pendant and LCD Electric.

7 Voltage

- B** = 115V, 1 phase, 50/60 Hz
E²⁾ = 208-240V, 1 phase, 50/60 Hz (with European plug EMC directive compliant).
I = 208-240V, 1 phase, 50/60 Hz (with NEMA 5-15 plug).
²⁾ E-voltage meet all CE requirements.

8 Factory installed features & options

(see page 88 for details)

- H** Heat exchanger (requires pump with LCD Electric) adds 4,1 kg.
K Skid bar (fits 4 and 8 litres reservoir) adds 2,2 kg.
T Pressure transducer (requires pump with LCD Electric).

ORDERING EXAMPLES

Model Nr: **ZU4104DE-HKT**

Two stage LCD Electric pump with dump valve and 4 litres reservoir, 230V motor, heat exchanger, skidbar and pressure transducer.

Model Nr: **ZU4408JE**

Two stage STD (standard) Electric pump with manual valve with pendant (jog) and 8 litres reservoir, 230V motor.

³⁾ Pendant includes 3 meters cord.

ZE-Series, 700 Bar Electric Pumps

- High-efficiency pump design – higher oil flow and bypass pressure, cooler running and requires 18% less current draw than comparable pumps
- High-strength, moulded electrical box protects electronics, power supplies and LCD readout and stands up to harsh industrial environments
- IP54 protection and isolation class
- Back-lit LCD provides self test, diagnostic and read-out capabilities never before offered on an industrial pump (included on pump with electric valves, optional on other models)
- Totally enclosed, fan-cooled industrial electric motors supply extended life and stand up to harsh industrial environment
- User adjustable relief valve built-in on manual and solenoid valves. Oil ports on valves are 3/8" NPTF
- Steel fan guard on all electric motors
- Full sight oil level glass
- 40 micron filter breather with splash guard
- Durable steel reservoirs.

⁴⁾ See custom ordering matrix on page 95 for other voltages.

User Adjustable Relief Valve

All VM and VE-Series have a user adjustable relief valve to allow the operator to easily set the optimum working pressure.

Locking Valves

For applications requiring positive load holding, VM-Series valves (except VM32) are available with a pilot-operated check valve. This provides hydraulic locking of the load until the valve is shifted into the retract position. To order this feature on your ZE-series pump see the valve type in the order matrix.

Page: 95

Single or Two-Stage

Choose single-stage pumps for applications that require constant flow regardless of pressure such as testing or clamping.

Two-stage pumps have an increased output flow at low pressure to allow fast movement towards the load, for reduced cycle times and increased productivity.

Electric Box ¹⁾

- Back-lit LCD
- Pump usage information, hour and cycle counts
- Low-voltage warning and recording
- Self-test and diagnostic capabilities
- Pressure read-out ²⁾
- Auto-mode pressure setting ²⁾
- Information can be displayed in six languages ³⁾

¹⁾ Included on pumps with solenoid valves. Can be factory installed on pumps with manual valve.

²⁾ When used with optional pressure transducer.

³⁾ English, French, German, Italian, Spanish and Portuguese.

Level/Temperature Switch ⁴⁾

- Shuts down pump before oil level reaches an unsafe level, avoiding damage due to cavitation
- Shuts down pump when unsafe oil temperature is reached
- Ideal if pump is used in remote area without visual access to oil level.

⁴⁾ 24 V, requires Electric Box. Available for 10, 20 and 40 litres reservoirs.

Access- sory Kit Modelnr.	Fixed Temperature Signal (°C)	Operating Tempe- rature (°C)	Max. Pressure (bar)
ZLS-U4 *	80	5 - 110	10

* Add suffix L for factory installation.

Return Line Filter

- 25 micron nominal filter removes contaminants from return oil flow before allowing it back into tank
- Internal by-pass valve prevents damage if filter is dirty
- With maintenance indicator
- Replaceable filter element PF25.

Access- sory Kit Modelnr.	Maximum Pressure (bar)	Maximum Oil Flow (l/min)	By-pass Setting (bar)
ZPF *	13,8	45,4	1,7

* Add suffix F for factory installation.

Roll Bars

- For easy portability and hoisting
- Protects pump and electric box
- Available for all reservoir sizes.

Skid Bar

- Provides easy two-hand lift
- Provides greater pump stability on soft or uneven surfaces.

Foot Switch ⁵⁾

- Hands-free remote control on solenoid dump and 3-position valves
- With 3 meters cord.

⁵⁾ 15 V, requires Electric Box.

Accessory Kit Nr.	Fits on reservoir	 (kg)
ZRB-04 *	4 and 8 litres	5,5
ZRB-10 *	10 litres	6,0
ZRB-20 *	20 litres	6,0
ZRB-40 *	40 litres	6,0

* Add suffix R for factory installation.

Access- sory Kit Nr.	For ZE-Series pumps with reservoir	 (kg)
SBZ-4 *	4-8 ltr, without heat exchanger	2,2
SBZ-4L *	4-8 ltr, with heat exchanger	3,2

* Add suffix K for factory installation.

Accessory Kit Nr.	Can be used on ZE-Series pumps with
ZCF-2 *	Solenoid VE-Series valves

* Add suffix U for factory installation.

Factory Options & Accessory Kits for ZE-Series Pumps

Pressure Transducer ¹⁾

- Displays pressure on LCD in bar, MPa or psi
- More accurate than analog gauge
- Calibration can be fine-tuned for certification
- Easy-viewing variable rate display
- "Set pressure" feature turns off motor at user defined pressure.

¹⁾ 24 V, requires Electric Box.

Access- ory Kit Modelnr.	Adjustable Pressure Range (bar)	Switch- point repea- tability	Dead- band (bar)
ZPT-U4 *	3,5 - 700	± 0,5%	3,5

* Add suffix T for factory installation.

Pressure Switch ²⁾

- Controls pump, monitors system
- Adjustable pressure 35-700 bar
- Includes glycerine filled 1000 bar pressure gauge G2536L
- Accuracy ± 1,5% of full scale.

²⁾ 24 V, requires Electric Box. Not available in combination with pressure transducer.

Access- ory Kit Modelnr.	Switch- point repea- tability	Deadband (bar)	Oil Ports (NPT)
ZPS-E3 *	± 2%	8 - 38	3/8"

* Add suffix P for factory installation.

Pendants ³⁾

- For pump types with valve operation "W" (No Valve, with Electric Box, without pendant)

³⁾ When ordering Enerpac VE-Series solenoid valve the pendant must be ordered separately. Pendant connection to be plugged into electric box

Pendant Model Nr.	To be used with solenoid valve:
ZCP-1	VE32D
ZCP-3	VE32, VE33, VE43

Heat Exchanger ⁴⁾

- Removes heat from bypass oil to provide cooler operation
- Stabilizes oil viscosity, increasing oil life and reduces wear of pump and other hydraulic components.

Accessory Kit Nr.	Fits on reservoir	(kg)
ZHE-E04 *	4 and 8 litres	4,1
ZHE-E10 *	10, 20 and 40 litres	4,1

⁴⁾ 24 VDC, requires electric box.

* Add suffix H for factory installation.

Options

Accessory Kits can be installed by customer. See chart below for options on **Standard Electric (without electric box)** or **LCD Electric (with electric box)**. Refer to page 95 for ordering matrix.

ZE-Series Options	Factory Installed		Accessory Kits	
	Std. Electr.	LCD Electr.	Std. Electr.	LCD Electr.
Return Line Filter	F	F	ZPF	ZPF
Skid Bar ¹⁾	K	K	SBZ	SBZ
Roll Bar	R	R	SRB	SRB
Single-stage	S	S	-	-
Heat Exchanger	-	H	-	ZHE
Pressure Gauge ²⁾	G	G	-	-
Pressure Switch ³⁾	-	P	-	ZPS-E3
Pressure Transducer ⁴⁾	-	T	-	ZPT-U4
Level/Temp Switch ⁵⁾	-	L	-	ZLS-U4
Foot Switch ⁶⁾	-	U	-	ZCF-2

¹⁾ Available for 4 and 8 litres reservoirs.

²⁾ Not available on pumps with pressure transducer.

³⁾ Includes 1000 bar gauge. Only available on manual valves without locking feature.

⁴⁾ Electric box can accept either pressure switch or pressure transducer, but not both.

⁵⁾ Available for 10, 20 and 40 litres reservoirs.

⁶⁾ For control of solenoid dump and 3-position valves.

ZPT-U4 Pressure Transducer

More durable against mechanical and hydraulic shock than analog gauges.

- Digital pressure read-out provides accuracy of 0,5% of full scale.
- Easy-viewing variable rate display automatically varies increments between 3, 14, 35 and 145 bar as rate of pressure change increases.
- "Set pressure" feature turns off motor at user defined pressure (or shifts valve to neutral on VE33 and VE43 valves).

ZHE-Series Heat Exchangers

Heat exchanger stabilizes oil temperature at 54 °C at 21 °C ambient temperature. Thermal transfer at 1,9 l/min and 21 °C ambient temperature: 900 Btu/hour [950 kJ].

Do not exceed max. oil flow of 26,5 l/min and max. pressure of 20,7 bar.

Not suitable for water-glycol or high water based fluids.

	12,29	12,15	2,86	2,73	Two-stage				

* Oil flow will be approximately 6/5 of these values at 60 Hz.

Single or Two-Stage

Choose single-stage pumps for

applications that require constant flow regardless of pressure such as testing or clamping.

Two-stage pumps have an increased output flow at low pressure to allow fast movement towards the load, for reduced cycle times and increased productivity.

ZE-Series Pumps with 4 - 8 litres reservoir

ZE-Series Pumps with 10 - 20 - 40 litres reservoir

① User adjustable relief valve on all manual and solenoid valves.

3/8" NPTF on A and B ports;

1/4" NPTF on auxiliary ports.

② Electric Box

③ Heat Exchanger

④ Roll Bar

⑤ Return Line Filter

⑥ Skid Bar

⑦ Oil Drain

⑧ Oil Drain / Oil Level/Temperature Switch

Reservoir Size (useable oil) (litres)	ZE-Series Pump Dimensions (mm)

ZE-Series, Pump Ordering Matrix

▼ This is how ZE-Series pump model numbers are built up:

1	2	3	4	5	6	7	8
Z	E	4	1	10	D	W	- F H L T
Product Type	Motor Type	Flow Group	Valve Type	Reservoir Size	Valve Operation	Motor Voltage	Factory installed options

1 Product Type

Z = Pump Class

2 Prime Mover

E = Induction electric motor

3 Flow Group

3 = 0,55 l/min @ 700 bar (0,75 kW)
4 = 0,82 l/min @ 700 bar (1,12 kW)
5¹⁾ = 1,64 l/min @ 700 bar (2,24 kW)
6¹⁾ = 2,73 l/min @ 700 bar (5,60 kW)

4 Valve Type

0 = No valve, with coverplate
1 = 3/2 Dump valve **VE32D**
2 = 3/2 manual **VM32**
3 = 3/3 manual **VM33** or electric **VE33**
4 = 4/3 manual **VM43** or electric **VE43**
6 = 3/3 manual locking valve **VM33L** with pilot operated check.
8 = 4/3 manual locking valve **VM43L** with pilot operated check.

5 Reservoir Size, useable oil

04²⁾ = 4 litres
08²⁾ = 8 litres
10 = 10 litres
20 = 20 litres
40 = 40 litres

8 Factory installed options

F = Return Line Filter
G⁶⁾ = 1000 bar gauge
H⁷⁾ = Heat exchanger
K = Skid Bar (only on 4-8 litres)
L⁷⁾ = Oil Level/Temperature Switch ⁸⁾
N = No reservoir handles (includes lifting eyes)
P⁷⁾ = Pressure Switch
R = Roll Bar
S = Single-stage pump unit
T⁷⁾ = Pressure transducer ⁹⁾
U⁷⁾ = Foot Switch

6 Valve Operation

D = **Dump valve** (solenoid), with pendant and Electric Box
L = **Manual valve**, without pendant, with Electric Box
M = **Manual valve**, without pendant, without Electric Box
N = **No valve**, without Electric Box
S = **Solenoid valve**, with pendant and Electric Box
W = **No valve**, with Electric Box, without pendant ¹⁰⁾

7 Motor Voltage

Single phase motor ³⁾

B³⁾ = 115V, 1 ph, 50-60Hz
E³⁾ = 208-240V, 1 ph, 50-60 Hz ⁴⁾
I³⁾ = 208-240V, 1 ph, 50-60 Hz (with USA plug).

Three phase motor ⁵⁾

M⁵⁾ = 190-200V, 3 ph, 50-60Hz
G⁵⁾ = 208-240V, 3 ph, 50-60 Hz
W⁵⁾ = 380-415V, 3 ph, 50-60 Hz
K⁵⁾ = 440V, 3 ph, 50-60 Hz
J⁵⁾ = 460-480V, 3 ph, 50-60 Hz
R⁵⁾ = 575V, 3 ph, 60 Hz

ZE Series

Reservoir Capacity:

4 - 40 litres

Flow at Rated Pressure:

0,55 - 2,73 l/min

Motor Size:

0,75 - 5,60 kW

Maximum Operating Pressure:

700 bar

How to Order Single-Stage Pumps

To specify a single-stage pump, place the letter "S" at the end of the model number. For example:

ZE4210ME-S

ZE4-Series pump, oil flow 0,82 l/min at 700 bar, VM32 manual valve, 10 litres reservoir, without electrical box, without pendant, 240 Volt 1-phase electric motor and single-stage pump unit.

ZE3120DW-S

ZE3-Series pump, oil flow 0,55 l/min at 700 bar, VE32D solenoid dump valve, 20 litres reservoir, with electrical box, without pendant, 400 Volt 3-phase electric motor and single-stage pump unit.

Pendants

When ordering Enerpac VE-Series solenoid valve for use on "W" type valve operation (No Valve, with Electric Box, without pendant) the pendant must be ordered separately. Pendant connection to be plugged into electric box.

¹⁾ ZE5 and ZE6-Series only available with 3-phase electric motors.

²⁾ 4 and 8 litres only available on ZE3 and ZE4-Series.

³⁾ 1-phase motors only available on ZE3 and ZE4-Series.

⁴⁾ 208-240V, 1 ph with European plug EMV directive compliant.

⁵⁾ Models with 3-ph motors without Electric Box shipped without cord, motor starter or overload protection.

⁶⁾ Not available on pumps with pressure transducer (T).

⁷⁾ Requires Electric Box.

⁸⁾ Not available on 4 and 8 litres reservoir.

⁹⁾ Provides digital pressure read-out on LCD-display of electric box.

¹⁰⁾ When using solenoid valve on valve type "W" order optional pendant.

All Z-Class electric pumps comply with CSA and CE requirements.

▼ Shown: PPE-9483-4

- Single-speed operation with two and four independent split-flow outlets
- Two-speed operation with high-flow outlet
- Oil delivery of each outlet remains equal regardless of pressure
- 60 litres usable oil capacity allows operation of a wide range of cylinders
- Powerful 4 and 9,5 kW motor, available in three voltage options

▼ To lift a rigid construction, four double-acting RR-2006 cylinders are powered by a 4-split electric PPE-9483-4 pump.

The Axial Piston Pump with four independant outlets

Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify

only genuine Enerpac hydraulic hoses.

Page: **120**

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the

System Components section for a full range of gauges.

Page: **119**

Locking Valves

Pumps with VM33 or VM43 manual valves may be ordered with locking valves. This locking feature provides

a hydraulic lock for the cylinder using pilot-operated check valves. To order this option, just place an "L" suffix at the end of the model number. For more information, contact your local Enerpac office.

Page: **133**

Pump Type	Motor Size (kW)	Usable Oil Capacity (litres)	Pump Series*	Pressure Rating (bar)		Output Flow Rate (l/min)	
				1st stage	2nd stage	1st stage	2nd stage
Two-speed	4,0	60	PPN-8000	190	700	14,5	1 x 4,2
	9,5	60	PPN-9000	300	700	14,5	1 x 8,0
Single-speed	9,5	60	PPN-9000-2	—	700	—	2 x 5,0
	9,5	60	PPN-9000-4	—	700	—	4 x 2,5

* The "N" in the model number stands for No Valve. All pump models can be ordered with Manual or Solenoid Valves. See selection chart on next page.

8000 and 9000-Series, Electric Pumps

▼ This is how 8000- and 9000-Series Pump Model Numbers are built up:

1 Product Type
2 Valve Control
3 Pump Series
4 Valve Type
5 Reservoir Capacity
6 Motor Voltage
7 Split-flow Outlets

1 Product Type

PP = Power Pump

2 Valve Control

N = No Valve
M = Manual
E = Solenoid (Electrical)

3 Pump Series

8 = 8000-Series, 4 kW
9 = 9000-Series, 9,5 kW

4 Valve Type

0 = No Valve
3 = 3-way, 2-position, manual valve (VM33)
4 = 4-way, 3-position, manual (VM43) or solenoid valve (VE43)

5 Reservoir Capacity

8 = 80 litres (usable 60 ltr)

6 Motor Voltage*

3 = 400 V, 3 ph, 50 Hz
5 = 230 V, 3 ph, 50 Hz
6 = 440 V, 3 ph, 50 Hz

* In the selection chart below only 400V models (suffix 3) are shown. To order 230V or 440V models, change this suffix to 5 or 6.

7 Split-Flow Outlets

9000-Series only
2 = 2 equal flow outlets of 5,0 l/min. at 700 bar
4 = 4 equal flow outlets of 2,5 l/min. at 700 bar

PP Series

Reservoir Capacity:

80 litres

Flow at Rated Pressure:

4 x 2,5 to 8,0 l/min

Motor Size:

4,0 - 9,5 kW

Maximum Operating Pressure:

700 bar

Speed Chart

To determine how a specific pump will operate your cylinder, see the Pump-Cylinder Speed Chart in the 'Yellow Pages'.

Page: **117**

Turbo II Air Hydraulic Pumps

▼ Shown from top to bottom: PAMG-1402N, PARG-1102N, PATG-1102N, PATG-1105N

- External adjustable pressure relief valve (behind sight glass)
- Lower air consumption and operating costs
- Return-to-tank port for use in remote valve applications
- Internal pressure relief valve provides overload protection
- Quieter operation – reduced noise level to 75 dBA reduces operator fatigue
- Operating air pressure: 1,7-8,6 bar, enables pump to start at extremely low pressure
- High efficiency cast aluminium air motor
- Reinforced heavy-duty lightweight reservoir for applications in tough environments
- Air pendant for remote control operation
- Composite air piston seal allows operation on completely dry air supply.

▼ Easily operated by hand or by foot.

Setting New Standards... ... in efficiency and reliability

RFL-102 Regulator-Filter-Lubricator

Recommended for use with all Turbo air pumps. Provides clean, lubricated air and allows for air pressure adjustment. Steel bowl guards are standard.

Large Reservoir Models

The Turbo II Air Pump is also available with an enlarged reservoir: **PATG-1105N**, **PAMG-1405N** and **PARG-1105N**.

Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

Page: 120

Pump and Cylinder Sets

Turbo II Air Pumps are also available as **sets** (pump, cylinder, gauge, couplers and hose) for your ordering convenience.

Page: 64

Used with Cylinder	Usable Oil Capacity (cm ³)	Model Number
Single-Acting	2081	PATG-1102N*

	3770	PARG-1105N
Double-Acting	2081	PAMG-1402N
	3770	PAMG-1405N

* Available as set. See note at this page.

Turbo II Air Hydraulic Pumps

PATG-models use a foot or hand operated treadle to control air and valve functions.

PAMG-models use a treadle with a locking feature to control air, and a 4-way manual valve to control hydraulics.

PARG-models use air pendant for remote control.

PATG, PARG

PAMG

PAH-Series, Air Hydraulic Pumps

▼ Shown: PAH-90

- Converts 2-7 bar air pressure to 18-900 bar hydraulic pressure
- Can be used with hydraulic oil or other non corrosive liquids such as water, kerosene, gasoline etc.
- Six models offer many pressure-flow combinations
- User supplied valving and reservoir provides system flexibility
- Exhaust-air muffler lowers sound level for reduced operator fatigue
- Heavy duty construction for long life, even in harsh environments
- Ideal for multi-fluid testing applications

▼ The PAH-05 was selected for pumping water at high flow for testing a heat exchanger.

The High-Flow 'Multi-Fluid' Pump

Multifluid Hand Pumps

Corrosion resistant hand pumps for low pressure filling and high pressure testing applications, suitable for a wide range of fluids.

Page: 74

Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify

only genuine Enerpac hydraulic hoses.

Page: 120

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer

to the System Components section for a full range of gauges.

Page: 119

▼ The PAH-Series pumps can be reservoir mounted (except PAH-90) or connected to an external tank.

Air Hydraulic Pumps

All PAH-Series air hydraulic pumps require a user supplied remote valve and reservoir.

For more ordering information, call your Enerpac distributor. For a full range of valves, please refer to the valve section of this catalogue.

FLOW CHART

Global Warranty Policy

ENERPAC products are warranted to be free of defects in materials and workmanship under normal use for as long as they are owned by the original purchaser, subject to the exclusions and limitations described below. This warranty does not cover ordinary wear and tear, overloading, alterations, (including repairs or attempted repairs by parties other than ENERPAC or its authorised service representatives), improper fluid, use in a manner for which they are not intended or use which is contrary to instructions for the products. THIS WARRANTY IS LIMITED TO NEW PRODUCTS SOLD THROUGH ENERPAC AUTHORISED DISTRIBUTORS, ORIGINAL EQUIPMENT MANUFACTURERS OR OTHER DESIGNATED CHANNELS OF DISTRIBUTION. NO AGENT, EMPLOYEE, OR OTHER REPRESENTATIVE OF ENERPAC HAS THE AUTHORITY TO IN ANY WAY CHANGE OR AMEND THIS WARRANTY.

Electronic products and components are warranted against defects in material and workmanship for a period of two years from the date of purchase.

The following items supplied with ENERPAC products are excluded from this warranty:

- Components not manufactured by ENERPAC, including air motors, electric motors, gasoline engines, and diesel engines. Such items are warranted to the extent of the warranty provided by the manufacturers of such items.
- Consumable items, including cutter blades, nut splitter chisels, punches and dies.
- Chains

If the customer believes a product is defective, the product must be delivered, or shipped freight prepaid, to the nearest ENERPAC Authorised Service Center. The customer should contact ENERPAC to locate an Authorised Service Center in the customer's area. Products that do not conform to this warranty will be repaired or replaced at ENERPAC's expense and returned by ground transportation, freight prepaid.

THE FOREGOING WARRANTY IS EXCLUSIVE AND IS IN LIEU OF ALL OTHER EXPRESS AND IMPLIED WARRANTIES, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

The remedy of repair, replacement or refund is customer's exclusive remedy in the event of breach of this warranty.

SELLER SHALL NOT BE SUBJECT TO AND DISCLAIMS:

- (a) ANY OTHER OBLIGATIONS OR LIABILITIES ARISING OUT OF BREACH OF CONTRACT OR OF WARRANTY,
- (b) ANY OBLIGATIONS WHATSOEVER ARISING FROM TORT CLAIMS (INCLUDING NEGLIGENCE AND STRICT LIABILITY) OR ARISING UNDER THEORIES OF LAW WITH RESPECT TO PRODUCTS SOLD OR SERVICES RENDERED BY SELLER OR ANY UNDERTAKINGS, ACTS OR OMISSIONS RELATING THERETO, AND
- (c) ALL CONSEQUENTIAL, INCIDENTAL AND CONTINGENT DAMAGES WHATSOEVER.

ENERPAC's liability in all cases is limited to, and shall not exceed, the purchase price paid.

Effective June 1, 1997

Enerpac 'Yellow Pages' stand for Hydraulic Information!

If selecting hydraulic equipment is not your daily routine, then you will appreciate these pages. The 'Yellow Pages' are designed to help you work with hydraulics. They will help you to better understand the basics of hydraulics, of system set-ups and of the most commonly used hydraulic techniques. The better your choice of equipment, the better you will appreciate hydraulics. Take the time to go through these 'Yellow Pages' and you will benefit even more from Enerpac High Pressure Hydraulics.

GLOBAL LIFETIME WARRANTY STATEMENT

www.enerpac.com

Visit our web site for the complete Global Lifetime Warranty or call your Authorized Service Center.

Page: 106

Enerpac products are warranted to be free of defects in materials and workmanship. Any product that does not conform to specification will be repaired or replaced at Enerpac's expense, anywhere in the world; simple as that !!

This warranty does not cover ordinary wear and tear, abuse, misuse, alterations, or the use of improper fluids. Determination of the authenticity of a warranty claim will be made only by Enerpac or its Authorized Service Centers.

Enerpac is certified for several quality standards. These standards require compliance with standards for management, administration, product development and manufacturing. Enerpac worked hard to earn the quality rating ISO 9001, in its ongoing pursuit of excellence.

ASME B30.1

Our cylinders fully comply with the criteria set forth by the American National Standards Institute (except 'BRD', 'CLL' and 'CLS' series).

UL approved

All electrical components used on Enerpac products carry the UL rating when possible.

IP 55F

All electric motors used on Enerpac power pumps meet this protection and insulation classification.

DIN 20024

Enerpac thermoplastic hoses are related to the criteria set forth in Deutsche Industrie Norm 20024.

Canadian Standards Association

Where specified, Enerpac electric pump assemblies meet the design, assembly and test requirements of the Canadian Standards Association.

Product Design Criteria

All hydraulic components are designed and tested to be safe for use at maximum 700 bar pressure unless otherwise specifically noted.

EMC Directive 89/336/EEC

Where specified, Enerpac electric power pumps meet the requirements for Electro-magnetic Compatibility per EMC Directive 89/336/EEC.

CE Marking & Conformity

Enerpac provides a Declaration of Conformity and CE marking for products that conform with the European Community Directives.

Safety Instructions

ENERPAC
Hydraulic Technology Worldwide

Hydraulic power is one of the safest methods of applying force to your work - when used correctly. And to that end we offer some DOs and DON'Ts, simple common sense points which apply to practically all Enerpac hydraulic products.

The line drawings and application photo's of Enerpac products throughout this catalog are used to portray how some of our

customers have used hydraulics in industry. In designing similar systems, care must be taken to select the proper components that provide safe operation and fit your needs. Check to see if all safety measures have been taken to avoid the risk of injury and property damage from your application or system. Enerpac can not be held responsible for damage or injury, caused by unsafe use, maintenance or

application of its products. Please contact the Enerpac office or a representative for guidance when you are in doubt as to the proper safety precautions to be taken in designing and setting up your particular system. In addition to these tips, every Enerpac product comes with instructions spelling out specific safety information. Please read them carefully.

Jacks

Provide a level and solid support for the entire jack base area.

The entire jack saddle must be in contact with the load. Movement of the load to be in the same direction as jack plunger.

Never place any part of your body under the load. Ensure the load is on a solid support before venturing under.

Remove the jack handle when it is not being used.

Cylinders

Provide a solid support for the entire cylinder base area. Use cylinder base attachment for more stability.

The entire cylinder saddle must be in contact with the load. Movement of the cylinder must be parallel with the movement of the load.

Do not use cylinder without saddle. This will cause plunger to "mushroom". Saddles distribute load evenly on the plunger.

As with jacks, never place any part of your body under the load. Load must be on cribbing before venturing under.

Always protect cylinder threads for use with attachments.

Keep hydraulic equipment away from open fire and temperatures above 65 °C (150 °F).

General

**Manufacturer's rating of load and stroke are maximum safe limits.
Good practice encourages using only 80% of these ratings!**

Always read instructions and safety warnings that come with your Enerpac hydraulic equipment.

Don't override the factory setting of relief valves. Always use a gauge to check system pressure.

Pumps

Don't use handle extenders. Hand pumps should be easy to operate when used correctly.

Close release valve finger tight. Using force will ruin the valve.

Fill pump only to recommended level. Fill only when connected cylinder is fully retracted.

Use only genuine Enerpac hydraulic oil. Wrong fluid can destroy seals and pump and will render your warranty null and void your guarantee.

Hoses and couplers

Clean both coupler parts before connecting. Use dust caps when coupler parts are not connected.

Detach cylinder only when fully retracted or use shut-off valves or safety valves to lock-in cylinder pressure

Keep hoses away from the area beneath loads.

Don't kink hoses. Bending radius should be at least 115 millimetres. Don't drive over or drop heavy objects on hoses.

Don't lift hydraulic equipment by the hoses.

- Lift slowly and check often
- Avoid standing in the line of force
- Anticipate possible problems and take steps to avoid them

Pump Selection

Basic System Set-ups

ENERPAC
Hydraulic Technology Worldwide

- 1 Cylinder**
Applies hydraulic force.
Page 7

- 2 Cylinder Base Plate**
For applications like lifting where additional cylinder stability is required.
Page 12

- 3 Pump**
Provides hydraulic flow.
Page 67

- 4 Hose**
Transports hydraulic fluid.
Page 120-121

- 5 Male Coupler**
For quick connection of the hose to system components.
Page 122-123

- 6 Female Coupler**
For quick connection of the hose end to the system components.
Page 120-121

- 7 Gauge**
To monitor pressure of the hydraulic circuit.
Page 126-131

- 8 Gauge adaptor**
For quick and easy gauge installation. Page 132

- 9 Swivel connector**
Allows proper alignment of valves and/or gauges. Used when units being connected cannot be rotated.
Page 132

- 10 Auto-Damper Valve V-10**
Used to protect gauge from damage due to sudden pressure pulses in the system. Needs no adjustment and allows correct positioning of gauge, prior to tightening.
Page 138-139

- 11 4-Way Directional Control Valve**
Controls the direction of hydraulic fluid in a double-acting system.
Page 136

Single-acting push application, such as in a press.

The handpump offers controlled cylinder advance, but may require many handpump strokes in longer stroke applications when the cylinder capacity is 25 ton or above.

Examples of pump, hose and cylinder sets can be found on page 64.

Single-acting cylinder with longer stroke used for lifting applications.

Double-acting cylinder set-up used for lifting applications where a slow controlled descent of the load must be maintained.

Double-acting cylinder set-up used in a push/pull application.

12 3-Way Directional Control Valve

Controls the direction of hydraulic fluid in a single-acting system.
Page 134

13 Safety Holding Valve

Controls load descent in lifting applications.
Page 138-139

14 Manifold

Allows distribution of hydraulic fluid from one power source to several cylinders
Page 124

15 Needle valve

Regulates the flow of hydraulic fluid to or from the cylinders.
Page 138-139

Two point lifting set-up using single-acting cylinders.

Four point lifting set-up, using single-acting cylinders and directional control valves.

Basic Hydraulics

ENERPAC
Hydraulic Technology Worldwide

Flow

A hydraulic pump produces flow.

Pressure

Pressure occurs when there is resistance to flow.

Pascal's Law

Pressure applied at any point upon a confined liquid is transmitted undiminished in all directions (Fig.1).

This means that when more than one hydraulic cylinder is being used, each cylinder will lift at its own rate, depending on the force required to move the load at that point (Fig. 2).

Figure 1

To have all cylinders operate uniformly so that the load is being lifted at the same rate at each point, either control valves (see Valve section) or Synchronous Lift System components (see Cylinder section) must be added to the system (Load B).

Cylinders with the lightest load will move first, and cylinders with the heaviest load will move last (Load A), as long as the cylinders have the same capacity.

Figure 2

CAUTION!

When lifting or pressing, always use a gauge.

A gauge is your 'window' to the system. It lets you see what's going on. You will find the gauges in the System Components section.

Page: 119

Learn more about hydraulics

Visit www.enerpac.com to learn more about hydraulics and system set-ups.

Force

The amount of force a hydraulic cylinder can generate is equal to the hydraulic pressure times the "effective area" of the cylinder (see cylinder selection charts).

Force	=	Hydraulic Working Pressure	x	Cylinder Effective Area
F	=	P	x	A

Use this formula to determine either force, pressure or effective area if two of the variables are known.

Example 1

An RC-106 cylinder with 14,5 cm² effective area operating at 700 bar will generate what force?

$$\text{Force} = 7000 \text{ N/cm}^2 \times 14,5 \text{ cm}^2 = 101500 \text{ N} = 101,5 \text{ kN}$$

Example 2

An RC-106 cylinder lifting 7000 kg will require what pressure?

$$\text{Pressure} = 7000 \times 9,8 \text{ N} \div 14,5 \text{ cm}^2 = 4731,0 \text{ N/cm}^2 = 473 \text{ bar.}$$

Example 3

An RC-256 cylinder is required to produce a force of 190.000 N. What pressure is required?

$$\text{Pressure} = 190.000 \text{ N} \div 33,2 \text{ cm}^2 = 5722,9 \text{ N/cm}^2 = 572 \text{ bar.}$$

Example 4

Four RC-308 cylinders are required to produce a force of 800.000 N. What pressure is required?

$$\text{Pressure} = 800.000 \text{ N} \div (4 \times 42,1 \text{ cm}^2) = 4750,6 \text{ N/cm}^2 = 476 \text{ bar.}$$

Remember, since four cylinders are used together, the area for one cylinder must be multiplied by the number of cylinders used.

Example 5

A CLL-2506 cylinder is going to be used with a power source that is capable of 500 bar. What is the theoretical force available from that cylinder?

$$\text{Force} = 5000 \text{ N/cm}^2 \times 366,4 \text{ cm}^2 = 1.832.000 \text{ N} = 1832 \text{ kN.}$$

Cylinder Oil Capacity

The volume of oil required for a cylinder (cylinder oil capacity) is equal to the effective area of the cylinder times the stroke*.

Cylinder Oil Capacity	=	Cylinder Effective Area	x	Cylinder Stroke
-----------------------	---	-------------------------	---	-----------------

Example 1:

An RC-158 cylinder with 20,3 cm² effective area and 200 mm stroke requires what volume of oil?

$$\text{Oil Capacity} = 20,3 \text{ cm}^2 \times 20 \text{ cm} = 406 \text{ cm}^3$$

Example 2:

An RC-5013 cylinder has an effective area of 71,2 cm² and a stroke of 320 mm. How much oil will be required?

$$\text{Oil Capacity} = 71,2 \text{ cm}^2 \times 32 \text{ cm} = 2278,4 \text{ cm}^3$$

Example 3:

An RC-10010 cylinder has an effective area of 133,3 cm² and a stroke of 260 mm. How much oil will it require?

$$\text{Oil Capacity} = 133,3 \text{ cm}^2 \times 26 \text{ cm} = 3466 \text{ cm}^3$$

Example 4:

Four RC-308 cylinders are being used, each with an effective area of 42,1 cm² and a stroke of 209 mm. How much oil will be required?

$$\text{Oil Capacity} = 42,1 \text{ cm}^2 \times 20,9 \text{ cm} = 880 \text{ cm}^3 \text{ for one cylinder}$$

Multiply by four to obtain the required capacity: 3520 cm³

* Note: these are theoretical examples and do not take into account the compressibility of oil under high pressure.

CAUTION!

Enerpac oil will compress 2,28% at 350 bar and 4,1% at 700 bar.

Page: 124

Conversion Tables

Key to cylinder dimensions

Dimensions shown in the Selection Charts of the cylinder section are identified on the relevant drawings by the capital letter references listed here: A for collapsed height through Z₁ for depth of internal base thread.

- A = Collapsed height
- B = Extended height
- C = Cylinder body length
- D = Cylinder outside diameter
- D₁ = Cylinder width
- E = Cylinder inside diameter
- F = Plunger rod diameter
- G = Oil inlet thread
- H = Cylinder bottom to advance port
- I = Cylinder top to retract port
- J = Saddle outside diameter
- K = Cylinder rod protrusion at collapsed height
- L = Plunger centre to side of base
- M = Mounting holes to plunger centre
- N = Length of smaller cylinder part
- O = Plunger hole or thread of saddle
- P = Plunger thread length
- Q = Plunger outside thread
- U = Bolt circle diameter of mounting holes
- V = Thread of cylinder mounting holes
- W = Collar thread
- X = Collar thread length
- Y = Centre hole diameter
- Z = Internal base thread
- Z₁ = Depth of internal base thread

Key to measurements

All capacities and measurements in the catalog are expressed in uniform values.
The conversion chart provides helpful information for their translation into equivalent systems.

All ton values specified in this catalogue are metric tonnes and are for cylinder class identification only.
Please refer to the kN data for calculations.

Pressure:

1 psi	= 0,069 bar

Cylinder Speed Charts

Cylinder Speed

This chart will help you calculate the time required for an Enerpac cylinder to lift a load when powered by a 700 bar Enerpac hydraulic pump. The Cylinder Speed Chart can also be used to determine the pump type and model best suited for an application when you know the plunger speed required.

To determine:

Cylinder plunger speed

An RC-256 cylinder (25 ton) is powered by a ZE3-Series two stage pump. While lifting the load, the cylinder plunger travels at 3,0 mm per second. While extending towards the load, the cylinder

30 ton		50 ton		75 ton		100 ton		Pump Serie/Type
No Load	Load	No Load	Load	No Load	Load	No Load	Load	
45,5	4,0	26,9	2,3	18,7	1,6	14,4	1,3	ZU4-Series
2,3	2,2	1,4	1,3	1,0	0,9	0,7	0,7	ZE3 one stage
24,3	2,2	14,4	1,3	10,0	0,9	7,7	0,7	ZE3 two stage
3,4	3,2	2,0	1,9	1,4	1,3	1,1	1,0	ZE4 one stage
35,2	3,2	20,8	1,9	14,4	1,3	11,1	1,0	ZE4 two stage
6,9	6,5	4,1	3,8	2,8	2,7	2,2	2,1	ZE5 one stage
46,0	6,5	27,2	3,8	18,9	2,7	14,5	2,1	ZE5 two stage
								ZE6 one stage

plunger travels at 30,9 mm per second.

To determine:

Best matching pump

Your 25 ton cylinder needs to move a load at a speed of 3,0 mm per second. Simply go down from the top of the chart, to the value of 3,0 mm per second. Follow the chart to the right to find that the ZE3-Series pump is most suitable for your application.

30 ton		50 ton		75 ton		100 ton		Pump Serie/Type

No Load indicates the plunger speed as the plunger extends towards the load (1st stage).

Load indicates the plunger speed as the load is lifted at a system pressure of 700 bar (2nd stage).

Example: At what speed (V) will the RC-256 (25 ton) cylinder move when powered by a ZE3-Series pump?

RC-256 Cylinder Effective Area = 33,2 cm²

ZE3-Series pump oil Flow (no load) = 6150 cm³/min

$$\text{Speed } V = \frac{6150 \text{ cm}^3/\text{min} \times 10}{33,2 \times 60} = 30,9 \text{ mm/sec}$$

$$\text{Cylinder Plunger Speed (mm/sec)} = \frac{\text{Pump Oil Flow (cm}^3/\text{min)} \times 10}{\text{Cylinder Effective Area (cm}^2) \times 60}$$

Valve Information

Ways

The (oil) ports on a valve.

A 3-way valve has 3 ports: pressure (P), tank (T), and cylinder (A).

A 4-way valve has 4 ports: pressure (P), tank (T), advance (A) and retract (B).

Single-Acting cylinders require at least a 3-way valve, and can, under certain instances, be operated with a 4-way valve.

Double-Acting cylinders require a 4-way valve, providing control of the flow to each cylinder port.

Positions

The number of control points a valve can provide. A 2-position valve has the ability to control only the advance or retraction of the cylinder. To be able to control the cylinder with a hold position, the valve requires a 3rd position.

Centre Configuration

The centre position of a valve is the position at which there is no movement required of the hydraulic component, whether a tool or cylinder.

The most common is the **Tandem Centre**. This configuration provides for little to no movement of the cylinder and the unloading of the pump. This provides for minimum heat build-up.

The next most common is the **Closed Centre** configuration, which is used mostly for independent control of multi-cylinder applications. This configuration again provides for little to no movement of the cylinder, but also dead-heads the pump, isolating it from the circuit. Use of this type of valve may require some means of unloading the pump to prevent heat build-up.

There are many more type of valves, such as Open Centre and Float Centre. These valves are used mostly in complex hydraulic circuits and require other special considerations.

Open
Centre

Float
Centre

Directional Control Valves

3-Way Valves

are used with single-acting cylinders

4-Way Valves

are used with double-acting cylinders

Valves may be either pump mounted or remote mounted.

Pump Mounted

Remote Mounted

Valves may be either manually or solenoid operated.

Manually Operated

Solenoid Operated

Advance Hold Retract

Single-acting cylinder

Controlled by a 3-way, 3-position valve.

Advance

The oil flows from the pump pressure port P to the

cylinder port A: the cylinder plunger will extend.

Hold

The oil flows from the pump pressure port P to the tank

T. The cylinder port A is closed: the cylinder plunger will maintain its position.

Retract

The oil flows from the pump and cylinder port A

to the tank T: the cylinder plunger will retract.

Double-acting cylinder

Controlled by a 4-way, 3-position valve.

Advance

The oil flows from the pump pressure port P to the

cylinder port A and from cylinder port B to tank T.

Hold

The oil flows from the pump pressure port P to the tank T.

The cylinder ports A and B are closed: the cylinder plunger will maintain position.

Retract

The oil flows from the pump pressure port P to cylinder

port B and from cylinder port A to tank T: the cylinder plunger will retract.

System Components Section Overview

ENERPAC System Components:

All the additional elements you need to complete your high pressure hydraulic system and get started.

Engineered to work with your Enerpac cylinders, pumps and tools, all Enerpac components are designed to the most exacting standards.

With this complete line of hydraulic hoses, couplers, fittings, manifolds, oil and gauges, Enerpac has the accessories to complement your system and ensure the efficient operation, long life and safety of your hydraulic equipment.

700-Series, High Pressure Hoses

▼ Shown from top to bottom: HA-7206B, HC-7206, H-7206

Thermo-Plastic Safety Hoses (700-Series)

- For demanding applications, featuring a 4:1 design factor
- Maximum working pressure of 700 bar
- Four layer design, including two high strength steel wire braids
- Outside jacket is polyurethane, to provide maximum abrasion resistance
- Exhibits low volumetric expansion under pressure to enhance overall system efficiency
- Crimped-on rubber strain relief for improved life and durability on all models

▼ To prevent back pressure and to increase cylinder retraction speed, when using long hoses with single-acting cylinders, the Enerpac HC-7300-Series of hoses with increased internal diameter is the best choice.

Safety and Quality

To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

WARNING !

- Do not exceed 700 bar maximum pressure.
- Do not handle hoses which are under pressure.

More safety instructions in our 'Yellow pages'.

* For technical information on couplers see next page.

Torque Wrench Hoses

Use Enerpac THC and THQ-Series twin safety hoses with double-acting wrenches to ensure the integrity of your hydraulic system.

Page: **206**

Fittings

For additional fittings see the fitting page of the System Components section.

Page: **125**

Hose Oil Capacity

When using greater hose lengths, it is sometimes necessary to fill the pump reservoir after filling the hoses. To determine the hose oil capacity, use the following:

For 6,4 mm inside diameter hoses:
Capacity (cm³) = 32,1699 x Length (m)

For 9,7 mm inside diameter hoses:
Capacity (cm³) = 73,8981 x Length (m)

A, C, F, T-Series, Hydraulic Couplers

Quick Connection of Hydraulic Lines

Thread sealer

To seal NPTF threads use one of the new anaerobic thread sealers or Teflon paste.

When using Teflon Tape, apply the tape one thread from the end of a fitting to prevent it from winding up in the hydraulic system.

WARNING!

Couplers should be pressurized only when completely connected and should not be coupled or uncoupled when pressurized.

More safety instructions in our 'Yellow Pages'.

Page: 108

3/8" High Flow Couplers

- Standard equipment on most Enerpac cylinders
- Recommended for use on all Enerpac pumps and cylinders where space and porting permits
- Includes "2-in-1" dust cap for use on male and female coupler halves

3/8" High Pressure 'Flush-face' Couplers

- Featuring "Push-to-connect" operation, to guarantee good connection every time
- Flush-face, zero-leak operation for minimal spillage
- HTMA* recognized for safety and performance
- Will not interchange with low pressure couplers

3/8" Regular Spee-D-Coupler®

- For medium duty applications with hand pumps
- Includes female aluminium dust cap

1/4" Regular Coupler

- For use with small cylinders and hand pumps
- Includes female aluminium dust cap

1/4" Spin-on Torque Wrench Couplers

- Use with 700 bar S and W-series torque wrenches, THQ-series hoses and torque wrench pumps with suffix "Q"

1/4" Lock-ring Torque Wrench Couplers (dustcaps included)

- Use with 800 bar SQD and HXD-series torque wrenches, THC-series hoses and torque wrench pumps

* Hydraulic Tool Manufacturers Association

▼ With the use of Enerpac High Flow Couplers, hoses are easily installed for multiple hydraulic line connections in this 34 points PLC-controlled lifting system.

Manifolds

Description	Model Number	Dimensions (mm)
178 mm Long Manifold with 7 female ports	A-64	
369 mm Long Manifold that allows direct mounting of control valves to the manifold. Plugs .38 NPTF.	A-65	
6-Port Hexagon Manifold. Plugs furnished for all ports 3/8"-18 NPTF.	A-66	
Premounted Manifolds Split-flow valve to control two or four single-acting cylinders simultaneously. AM-21 with 5 ports 3/8" NPTF. AM-41 with 7 ports 3/8" NPTF.	AM-21 AM-41	

Hydraulic Oil, Manifolds and Fittings

Recommended Tubing

Enerpac does not supply high-pressure pipe or tubing, but recommends the use of cold drawn steel tubing in stead of regular pipe in the following dimensions:

In stead of .25" pipe, use 13 mm O.D. x 11 ga. (3 mm) wall.

In stead of .38" pipe, use 9 mm Schedule 80 seamless pipe.

In stead of .50" pipe, use 21 mm O.D. x .4 mm wall.

This tubing can be threaded with standard pipe threading dies.

Hydraulic Force & Pressure Gauges

▼ Shown from left to right: GP-230B, GF-835B, GP-10S

- **GF-series gauges:** calibrated with dual scale reading for pressure and force in bar and kN
- **GF-series gauges:** all pressure sensing parts are sealed and dampened by glycerine for long life
- **GP-series gauges:** calibrated with dual scale reading for pressure in bar and psi
- **Excellent readability:** gauge face dimensions 100 mm
- **Fast, easy installation**
- **Stainless steel gauge cases for corrosion resistance**

▼ A GP-10S gauge is used on this press to check the hydraulic pressure required to bend flat steel bar.

Visual Reference for System Pressure and Force

Auto-Damper Valve V-10

For automatic control of gauge fluctuations, the **V-10** Auto-Damper Valve controls the movement of the gauge needle by restricting oil flow in and out of the gauge. No adjustments needed.

Page: 139

Snubber Valve V-91

Infinitely adjustable for metering oil out of a gauge. The **V-91** Snubber Valve is also suitable as a shut-off valve to protect the gauge during high cycle applications.

Hydraulic Force & Pressure Gauges

Maximum Indicator Pointer

Indicator retains peak readings of pressure or force generated by the system.
Order model nr: **BSA-881**.

Can easily be installed on GP-Series dry gauges.

Pressure Gauges

To measure the input pressure into cylinders or high pressure systems. Also for all testing applications.

Load Gauges

To measure external load supported by a cylinder or jack in kN. For pressing parts together under pre-determined loads, weighing, testing, etc.

GP-Series are dry gauges.

GF-Series are glycerine filled gauges.

G, H-Series, Hydraulic Pressure Gauges

ENERPAC 
Hydraulic Technology Worldwide

▼ Shown from left to right: H4049L, G-2534R, G-4089L, G-2535L, G-4040L

Glycerine Filled (G-Series)

- Dual scale reading calibrated in bar and psi
- All pressure sensing parts sealed and dampened by glycerine for long life
- Includes safety blow-out disk and pressure equalizing membrane
- Gauge snubbers or needle valves recommended for high cycle applications

High Cycle Dry Gauges (H-Series)

- Dual scale reading calibrated in bar and psi
- Ideal for use in many applications, specifically for high cycle and harsh environments
- Gauge snubbers or needle valves recommended to shut off gauge when not in use

Visual Reference of System Pressure

Gauge adaptor

For easy gauge installation into almost any system, Enerpac offers a complete line of gauge adaptors.

Page: **132**

Snubber Valve V-91

Infinitely adjustable for metering oil out of a gauge. The V-91 Snubber Valve is also suitable as a shut-off

valve to protect the gauge during high cycle applications.

Page: **139**

◀ When lifting or pressing, always use a gauge. A gauge is your 'window' to the system. It lets you see what's going on.

Valves Section Overview

ENERPAC hydraulic valves are available in a wide variety of models and configurations.

Whatever your requirements... directional control, flow control, or pressure control... you can be sure that Enerpac has the correct valve to match your application exactly.

Designed and manufactured for safe operation up to 700 bar, the range of Enerpac valves allows for direct pump mounting, remote mounting, manual or solenoid actuation, and in-line installation, giving you flexible solutions to control your hydraulic system.

Valve Type	Series		Page

3-Way Directional Control Valves

▼ Shown from left to right: VE32D, VE33, VC-3L, VM33L, VM32

- User adjustable relief valves on VM- and VE-Series allow the operator to easily set the working pressure for each application
- All VM- and VE-series valves feature several gauge ports for “system”, A and B port pressure monitoring
- All valves (except VM32, VE32D and VC-Series) include manifold with built-in “System Check” feature, for more precise pressure holding and improved system control
- VM33 has improved porting for faster cylinder retraction while pump motor is running
- VE-Series solenoid valves include wire and connectors
- Manual or solenoid operation.

◀ A typical multi-cylinder control set-up using solenoid directional control valves.

For Reliable Control of Single-Acting Cylinders

Pressure and Flow Control Valves

▼ From left to right: V-152, V-66, V-82, V-161, V-42, V-17

Your Hydraulic Control Solution

Valve Applications

To see these valves used in typical hydraulic circuits, please see our 'Yellow Pages'.

Page: 112

▼ The V-152 pressure relief valve limits the pressure or force developed in the hydraulic system.

- All valves are rated for 700 bar operating pressure
- All valves feature NPTF porting to insure against leakage at rated pressure
- All valves are painted, coated, or plated for corrosion resistance
- Viton® seals (in V-66NV and V-152NV) for high temperature applications, nickel-plated for maximum corrosion resistance

Valve dimensions in mm

Pressure and Flow Control Valves

Premounted Manifolds

Page: 125

V Series

Maximum Operating Pressure:

700 bar

Valve Type and Model Number		Description		Hydraulic Symbol
Needle Valve V-82 V-182 V-8F		V-82: To control cylinder speed. Can also be used as shut-off valve for temporary load holding. $\frac{3}{8}$ " NPTF female ports. V-182: Same as V-82, but with	$\frac{1}{4}$ " NPTF female ports. Also suitable for gauge snubbing (also V-82). V-8F: Like V-82, but with very fine metering for precise flow control. Not recommended as shut-off valve.	
Snubber Valve V-91		V-91: Infinitely adjustable for metering oil out of a gauge to prevent snapping of gauge pointer when load or pressure is suddenly released. Also suitable as shut-off	valve to protect the gauge during high cycling applications. $\frac{1}{2}$ " NPTF male and female threads for use with GA-1, GA-2 or GA-4 gauge adaptors.	
Auto Damper® Valve V-10		V-10: To be used when gauge pressure must be monitored during high cycle applications. Creates a flow resistance when load is released suddenly.	No adjustments are necessary. $\frac{1}{2}$ " NPTF male and female threads for use with GA-1, GA-2 or GA-4 gauge adaptors.	
Check Valve V-17		V-17: Ruggedly built to resist shock and operate with low pressure drop. Closes smoothly without pounding. $\frac{3}{8}$ " NPTF female ports.		
Pilot Operated Check Valve V-42		V-42: Can be mounted at the cylinder to hold the load in case of system pressure loss. Normally used with double-acting cylinders where pilot port receives pressure from a	Tee-fitting in the cylinder retract line. $\frac{3}{8}$ " NPTF female ports. Pilot pressure ratio 14% (6,5:1).	
Manually Operated Check Valve V-66, V-66NV * V-66F		V-66, V-66NV: For load holding applications with single and double acting cylinders. Valves allow oil to flow back to tank when cylinder retracts. V-66NV with Viton seals,	nickel-plated. V-66F: Similar to V-66, but with very fine metering capability for precise flow control. V-66F is not designed for load holding.	
Pressure Relief Valve V-152 V-152NV *		V-152: Limits pressure developed by the pump in hydraulic circuit, thus limiting the force imposed on other components. Valve opens whenever preset pressure is reached.	To increase pressure setting, turn handle clockwise. Includes: • 0.9 m return line hose kit, • $\pm 3\%$ repeatability, • 55-700 bar adjustment range.	
Sequence Valve V-161		V-161: To control oil flow to a secondary circuit. Flow is blocked until system pressure rises to the V-161 setting. When this pressure level is reached, the V-161 opens to	allow flow to the secondary circuit. A pressure differential is always maintained between the primary and secondary circuit. Min. operating pressure: 140 bar.	

* See page 62 for more information about products for use in high temperature and extreme environment applications.

Enerpac Hydraulic Presses

ENERPAC 
Hydraulic Technology Worldwide

ENERPAC Hydraulic Presses are available in a variety of capacities and sizes. The press frames are welded for maximum strength and durability. Strong frames and powerful high-pressure hydraulics will provide years of dependable service in many applications.

Enerpac Presses are available in Bench, C-Frame, Arbor, Workshop and Roll-Frame models.

For safety reasons, all Enerpac presses with air and electric-drive pumps can be supplied with hand operated valves. This allows operation only when the valve handle is hand-held in the appropriate position. Once released, the valve automatically returns to the centre (hold) position.

These Press features increase productivity and broaden the range of applications:

The exclusive “Hydrajust” bed positioning is standard on 50, 100 and 200 ton VLP-Series workshop presses with double-acting cylinder, allowing adjustment of the lower bed.

Moveable pumptable on presses with electric pumps allow for easy side loading of large workpieces.

Optional “V-blocks” for positioning of complex parts, are designed with high-strength steel for long life.

Press Section Overview

Capacity ton (kN)	Press type and functions	Serie	Page
10 (101)	Bench Presses	VLP	 142 ▶
25-200 (232-1995)	Workshop Presses	VLP	 142 ▶
50-200 (498-1995)	Roll-Frame Presses	BPR	 144 ▶
5-20 (45-178)	C-Clamp Presses	A	 146 ▶
10-30 (101-295)	Arbor Presses	A	 146 ▶
10-200 (101-1995)	Press Accessories Press Speed Chart	VB, A IPL	 148 ▶
900-90.000 kg	Tension Meters Load Cells	TM LH	 149 ▶

Available in capacities from 10 to 200 ton, each Enerpac press consists of three basic high quality components: a press frame, a power source and a cylinder.

Welded Frame

All presses feature a welded steel frame for optimum strength. The larger models include features like workpiece side-loading and height adjustment of the lower bed.

Power Source

Depending on the production requirements, Enerpac presses can be powered by manual, air-hydraulic and electric-drive power sources.

Cylinder

Depending on the application, double-acting cylinders offer increased efficiency. Check out the Selection Charts for the press best suited for your needs.

Gauge

All Workshop presses and Roll-Frame Presses feature an easy to monitor pressure/force gauge for increased safety.

IMPORTANT!

The frameworks of the workshop presses are exclusively designed for pressing operations, not for pulling. For pulling applications please contact Enerpac.

In order to fully comply with CE regulations, some presses must be equipped with specific safety components, such as spring centered valves, two-hand control devices or others.

VLP-Series, Bench and Workshop Presses

▼ From left to right: VLP-506ZE5S, VLP-1006ZE3S, VLP-106P142, VLP256PAT1

- Quality welded frame for maximum strength and stability
- Optimum daylight and bed width
- With hand pump, air or electric driven power source
- Single or double-acting GOLDEN RING DESIGN cylinders
- Standard glycerine filled gauge with scale reading in kN/bar
- Moveable pump table on presses with electric pump allows for easy side loading for large workpieces
- Height adjustment of lower bed on 25 ton press with a winch
- Unique "Hydrajust" bed positioning device on 50, 100 and 200 ton press with double-acting cylinder allows adjustment of the lower bed

No Workshop can do without one

Optional V-Blocks

To facilitate positioning of pipes and bars, or placed upside-down, to serve as a convenient worktable.

Featuring precise fit into the press bolster. Each model number includes two V-blocks.

To be used with VLP-press ton	V-Blocks Model Number

25	GF-20B	GA-2
50	GF-50B	GA-2
100	GF-871B	GA-3
200	GF-200B	GA-3

Page: 126

"Hydrajust" Bed Positioning

Allows vertical adjustment of the lower bed on the 50, 100 and 200 ton VLP press.

The "Hydrajust" bed positioning is not designed to withstand full cylinder capacity, only to be used for bed adjustment.

Page: 148

VLP Series

Capacity:

10 - 200 ton

Maximum Daylight x Width:

1340 x 1220 mm

Maximum Operating Pressure:

700 bar

IMPORTANT! The frameworks of the workshop presses are exclusively designed for pressing operations, not for pulling. For pulling applications please contact Enerpac.

BPR-Series, Roll-Frame Presses

▼ Shown: BPR-5075

- Quality welded frame for maximum strength and long life
- Frame rolls easily on 4 steel roller bearings
- Exclusive 'Hydra-Lift' bolster for effortless adjustment of the vertical daylight
- Roller head design is standard to allow lateral movement and locking of the cylinder up to 300 mm left or right of centre
- All models in the quick selection chart have been matched to an electric pump, double-acting cylinder, hose and gauge, offering the complete package
- Roll-Frame design features a stationary bed with the ability to support heavy loads

Expert Designed Versatility

Cylinder adjustment

Cylinder adjustment allows horizontal side to side cylinder positioning.

Hydra-Lift

Allows easy, effortless daylight adjustment. Standard on all Roll-Frame presses.

Page: **148**

Optional V-Blocks

These V-Blocks are designed for easy fixturing of round stock and other non-uniform materials. Featuring precise fit into the press bolster.

A-Series, C-Clamp and Arbor Presses

▼ Shown from left to right: A-220, A-330 and A-310

C-Clamp Press

- 5, 10 and 20 ton capacity
- Operational in all positions

Arbor Press

- 10 and 30 ton capacity
- Foot mounting holes for horizontal or vertical positioning
- Machined working surfaces for easier fixturing
- Slotted back to simplify loading and unloading of longer parts

The Standard Workshop Tools

Push Pin A-183

For applications requiring precision pressing, such as shaft removal and insertion. This attachment fits 10 ton cylinders and requires the use of a threaded adaptor saddle (A-13).

Smooth Saddle A-185

For pressing applications of delicate parts, such as aluminium castings, this saddle decreases surface marks during the pressing application. Requires 10 ton cylinder and threaded adaptor saddle (A-13).

Page: **168**

10 ton Bench Presses

For 10 ton VLP-Series Bench Presses selection see:

Page: **142**

Hydraulic and Mechanical Pullers

ENERPAC 
Hydraulic Technology Worldwide

ENERPAC offers a complete line of pullers with the widest range of sizes, capacities and styles. Whether your application requires mechanical, hydraulic or the patented Posi Lock® system, Enerpac can satisfy your requirements.

Made of high strength steel alloys, you can depend on Enerpac pullers to provide years of trouble-free operation, even in the harshest environments.

Hydraulic Pullers

These hydraulic pullers eliminate time-consuming and unsafe hammering, heating or prying. Damage to parts is minimized through the use of controlled hydraulic power.

Posi Lock® Pullers

The puller that meets the safety challenge. A control cage holds the pulling jaws securely in working position. This patented feature reduces the possibility of the puller jaws slipping off the work surface, thereby increasing productivity and tool life and reducing dangerous situations for the user. The Posi Lock® feature is available in a mechanical or hydraulic version.

WARNING
Do not exceed 50% of the rated puller capacity when using a double crosshead (2 griparms) or when using puller legs in combination with bearing puller attachment.

Always wear Safety Goggles while using pullers.

Puller Section Overview

When selecting a puller it is important to consider 3 basic specifications:

1. The Capacity:

is the amount of force the puller is capable of producing. Typically, the capacity required for a job can be determined by using the shaft diameter of the part being pulled. For manual pullers, the center bolt diameter of the puller should be at least half the diameter of the shaft being pulled from. For hydraulic pullers, the capacity in tons should be 0,28 to 0,4 times the shaft diameter in mm. Use the following chart:

Shaft Diameter	Puller Capacity
0 - 25 mm	10 ton
25 - 50 mm	20 ton
50 - 89 mm	30 ton
89 - 140 mm	50 ton

2. The Reach:

is the distance between the bottom of the base and the jaw flats. The puller's reach must equal or exceed the same distance of the part being pulled.

3. The Spread:

is the distance between the jaws. The puller's spread needs to be greater than the width of the part being pulled.

Puller Function	Capacity ton	Puller Type	Series	Page
	8-50	Master Puller Sets Max. Reach: 252 - 700 mm Max. Spread: 250 - 1100 mm	BHP	152 ►

BHP-Series, Master Puller Sets

▼ Shown: Master Puller Set BHP-3751G

Multi Purpose Puller Set

WARNING

Do not exceed 50% of the rated puller capacity when using a double crosshead (2 griparms) or when using puller legs in combination with bearing puller attachment.

Visit the **Products** section of our web site for more information and product selection charts regarding puller sets and individual puller component parts.
www.enerpac.com

- Supplied with a full hydraulic set including pump, hose, cylinder, gauge, gauge adaptor and wooden case
- All Master Puller Sets include a Grip Puller, a Cross Bearing Puller, a Bearing Cup Puller and a Bearing Puller Attachment
- High quality, forged steel components provide superior reliability and service
- Sets include speed crank and adjusting screw for fast contact to work before hydraulics are applied

Maintenance engineers throughout the industry greatly appreciate the Enerpac Master Puller sets ►

Cross Bearing Puller Sets

▼ Shown: Cross Bearing Puller Set BHP-361G

- Precise hydraulic control allows fast, efficient and safe pulling
- High quality, forged steel components provide superior reliability and service

BHP Series

Capacity:

8, 20, 30 and 50 ton

Reach:

354- 863 mm

Spread:

266 - 570 mm

Maximum Operating Pressure:

700 bar

Visit the **Products** section of our web site for more information and product selection charts regarding puller sets and individual puller component parts.

Bearing Puller

Bearing Puller has wedge shaped edges for placing puller behind hard to reach bearings, gears, etc., where clearance prevents direct application of grip puller arms. The Bearing Puller can be used with the Cross Bearing Puller or the Grip Puller.

▼ Shown from left to right: EP-206, EP-108

- Patented 'Safety Cage' jaw retention system
- Roll threaded shafts for less effort when applying high torque
- Slim tapered jaws for improved gripping in tight spots
- Available in 2 and 3 jaw design and inside and outside pulling configuration
- More efficient pulling, as one man can do the job where manual pullers often require two operators

For Safer and Faster Pulling

Long Jaws

Long Jaws are used to increase the reach and spread of manual pullers. They maintain the same pulling capacity as the standard jaws, but reduce clamping force to 25%.

Page: 159

Shaft Attachments

Shaft protectors and extenders are live centers that fit over the standard puller shaft for tip protection and additional reach.

Page: 159

Application Tip

Because of the unique safety cage design, Posi Lock® pullers will grip on surfaces where normal pullers would slip off; e.g. tapered bearings.

◀ Positioning an EP-104 3-jaw puller on the accessory drive of a diesel engine.

Posi Lock® Mechanical Grip Pullers

Posi Lock® Pullers

- 1 Patented 'Safety Cage' guides jaws, holding them securely onto the part.
- 2 Durable forged jaws provide positive grip.
- 3 Jaw head provides pivot and reaction point for jaws.
- 4 Pin, for easy jaw removal and replacement.
- 5 T-handle provides control of the puller jaws.
- 6 Drive bolt with rolled threads for increased force with reduced input torque.
- 7 Snap-ring retains cage to drive bolt and provides quick removal for easy service.

EP EPPMI Series

Capacity:

2 - 40 ton

Maximum Reach:

101- 355 mm

Spread Range:

12- 635 mm

2	355	76 - 635	35 (311)	EP-216	31	25,8
3	355	76 - 635	40 (356)	EP-116	31	30,8

Always wear Safety Goggles while using pullers.

Visit the **Products** section of our web site for more information and product selection charts regarding puller sets and individual puller component parts.
www.enerpac.com

Application Tip

In determining the correct manual puller capacity for your application, use the following rule:

The center bolt diameter of the puller should be at least $\frac{1}{2}$ the diameter of the shaft being pulled on.

Example:

A part being pulled from a shaft with a diameter of 38 mm would require a puller with a center bolt diameter of at least 19 mm.

Long Jaws are optional accessories and used for added reach and spread. They have the same load capacity as standard jaws with 25% of the clamping force.

Posi Lock® 100 Ton Hydraulic Grip Pullers

▼ EPH-1003E

- Roller cart with power lift
- Hydraulically actuated lift cylinder on cart extends puller from ground to a height of 1,7 m
- Adjustable jaw tips
- Puller easily detaches from cart
- Includes electric two stage pump with remote jog switch for fingertip control of the removal process
- Puller height range 673 to 1690 mm
- Multiple pushing adaptors included

◀ The EPH-1003E quickly and easily removes this drive sheave from its shaft.

EPH Series

Capacity:

100 ton

Maximum Reach:

1219 mm

Spread Range:

190-1778 mm

Maximum Operating Pressure:

700 bar

Pushing Adaptors

All Posi Lock® 100 Ton Hydraulic Pullers include following pushing adaptors.

Diameter (mm)	Length (mm)	Model Number
89	737	EPHT-1162
89	483	EPHT-1163
89	229	EPHT-1164

ENERPAC offers an extensive range of dedicated tools for a variety of specific and flexible applications.

Whatever your requirement... cutting, punching, spreading or bending... you can be sure that Enerpac has the correct tool to do your job safely and efficiently.

Featuring maintenance sets, machine lifts and load skates, as well as hole punches, pipe benders and cable cutters, Enerpac has the tools to ensure that even your most demanding applications can be undertaken with the highest degree of safety and accuracy.

Pump and Tool Sets

Most hydraulic tools in this section are available in **sets**, for a perfect tool-pump match.

Hydraulic System Set-up

Check out our 'Yellow Pages' section for help on system set-ups and valving configurations.

Page: **112**

Bolting Tools

More Enerpac Tools you will find in our Bolting Tools section in this catalogue.

The Universal Hydraulic Tool Box

Maintenance Sets

Enerpac Maintenance sets are a complete assortment of hydraulic powered tools. Using these sets allows you to quickly configure a unique tool to meet your most difficult jobs. Built around the Enerpac lightweight hand pump, hose and cylinder, these sets enable you to push, pull, lift, press, straighten, spread and clamp with forces up to 12,5 ton.

- All sets include Enerpac pump, hose, cylinder and gauge
- Lock-on or threaded connectors
- Complete maintenance set for almost every maintenance application

◀ *Clamping a workpiece is just one of the many applications for the Enerpac maintenance sets.*

More Information

For detailed information on all included attachments, see the next pages.

Page: 168

▼ QUICK SELECTION CHART

Capacity using attachments*	Set Model Number						Number of Attachment Components	 (kg)
2,5 (22)	MS2-4	P-142	HC-7206	RC-55	GP-10S	GA-2	35	26
2,5 (22)	MSFP-5	P-142	HC-7206	RC-55	G2535L	GA-3	24	20
5,0 (50)	MSFP-10	P-392	HC-7206	RC-106	G2535L	GA-3	22	48
5,0 (50)	MS2-10	P-392	HC-7206	RC-106	GP-10S	GA-2	40	63
12,5 (116)	MS2-20	P-392	HC-7206	RC-256	GP-10S	GA-2	19	95
5,0-12,5 (50-116)	MS2-1020	P-392	HC-7206	RC-102, -106, -256	GP-10S	GA-2	59	158

* If no attachments are being used, capacity is double these values. Maximum operating pressure is then 700 bar.

Universal Maintenance Sets

CAUTION!

When cylinders are used with maintenance set attachments or components, the maximum system pressure must be limited to half the rated pressure (350 bar).

WARNING!

Only use attachments provided with set. Non-Enerpac attachments and longer extension tubes will reduce column strength.

MS Series

Capacity (using attachments):

2,5-12,5 ton

Maximum Operating Pressure:

350 bar

▼ APPLICATION EXAMPLES

MS-Series, Maintenance Sets

CAUTION! When cylinders are used with maintenance set attachments or components, the maximum system pressure must be limited to half the rated pressure (350 bar).

Note: All dimensions in millimetres.

SP-Series, Lightweight Hydraulic Punch

ENERPAC 
Hydraulic Technology Worldwide

▼ Shown: SP-35S

- 12,7 mm thick capacity through mild steel
- Round, oblong and square punches and dies are available to solve your punching applications
- Long life Enerpac single-acting, spring return design
- Durable steel case keeps tools and dies together and provides for easy carrying and storage
- CR-400 coupler included

◀ This PUD-1100E Economy Electric Pump is available as a matched set with the 35 ton punch.

Much Faster than Drilling

Tool Kit SPK-10

Included with all 35 Ton punches, this tool kit is used to remove and install the punch into the head.

Can be ordered as a replacement under model number **SPK-10**.

Ordering Information

The 35 ton hydraulic Punch may be ordered by itself or as a set, including a pump. A punch or die may also be ordered separately or as a matched set. Please refer to the Quick Selection Chart information on top of the next page.

Hydraulic Vertical Lifting Wedge

▼ LW-16 with SB-2 and optional LWB-1

- Requires very small access gap of only 10 mm
- Lifting force 16 ton at 700 bar hydraulic pressure
- Each step can spread under full load
- Straight vertical lifting
- Unique interlocking wedge design: no first step bending and risk of slipping out
- Single-acting, spring return cylinder
- Lifting wedge LW-16 includes safety block SB-2
- Includes RC-Series Cylinder with CR-400 coupler

LW Series

Maximum Lifting Force:

16 ton

Lifting Stroke:

21 mm

Tip Clearance / Maximum Spread*:

10 mm / 81,5 mm

Maximum Operating Pressure:

700 bar

Split-Flow Manifolds

Split Flow Valves to control two or four lifting wedges simultaneously.

AM-21 with 3 ports 3/8" NPTF
AM-41 with 5 ports 3/8" NPTF.

Page: **124**

Best Match Hand Pump

To power your Enerpac Lifting Wedge, the Enerpac P-392 Hand Pump or P-392FP Foot Pump is an ideal choice.

Page: **68**

▼ For lifting heavy equipment with minimum floor clearance the LW-16 is the ideal tool.

Maximum Lifting Force ton (kN)	Lifting Stroke (mm)	Model Number	Tip Clearance (mm)	Maximum Operating Pressure (bar)	Oil Capacity (cm ³)	 (kg)
16 (157)	21	LW-16	10	700	78	9,0

Use optional stepped block **LWB-1** to increase wedge lifting height by 30 mm.

* Using LWB-1.

Hydraulic Machine Lifts

▼ Shown: **SOH-10-6**

SOH Series

Lifting Capacity:

8,5 - 20 ton

Stroke:

136-157 mm

Toe Clearance:

20 mm

Maximum Operating Pressure:

700 bar

Load Skates

In combination with the Enerpac Machine Lifts we recommend Load Skates for moving heavy loads.

Page: **174**

Best Match Hand Pump

To power your Enerpac Machine Lift, the Enerpac **P-392** hand pump is an ideal choice.

Page: **68**

- For lifting heavy equipment with minimum available access
- Separate hydraulic pump enhances safety
- Low height lifting toe
- Precision guided to reduce friction and isolate cylinder from side-loads
- Two extendible support feet provide extra stability
- Includes RC-Series Cylinder with CR-400 coupler

Capacity	Toe Clearance (mm)			Stroke	Model Number	Oil Capacity	Dimensions (mm)							
	Minimum A1	Central A2	Maximum A3				Total Ext. Height C	Total Body Height D	F	H	J	K	(kg)	
8,5 (75)	20	95	169	136	SOH-10-6	224	430	294	—	190	214	74	26	
20 (178)	30	110	190	157	SOH-23-6	525	472	320	65	265	250	80	45	

ER-Series, Heavy Duty Load Skates

▼ Shown: Set ER-20

- Rugged and sturdy construction for long life
- Low profile construction for increased stability
- Low rolling-resistance allows for easy transportation
- Attachable load leveling plates and swivel turntables for turning corners

Move Heavy Loads Easily and Safely

Sets (see table) include all components necessary to handle a variety of applications.

Two **ELB-1** link-up bars, two **ERH-1** handles (880 mm long) and one **EMB-1** metal box are included.

Optional long handle **ERH-2** (1295 mm) available for 60 and 80 ton only.

Lifting Wedge and Machine Lifts

To place the Load Skates, the load must first be lifted. This can be done easily and safely using the Enerpac Lifting Wedge or Machine Lifts.

Page: 172

▼ Load Skates may be ordered separately or as a matched set.

Set Capacity*	Set Model Number	Load Skates (4)	Turntable Swivels (2)	Leveling Plates (2)	Weight Including handles and metal box

STB-Series, Pipe Bender Sets

▼ Shown: STB-101H

Quick, Safe and Wrinkle-free Bending

'One Shot' and 'Sweep'

One shot shoes give up to a 90° bend without resetting.

Sweep shoes are used where increasing radii are required for multiple parallel pipe installations.

- Makes smooth, wrinkle-free bends
- Sets include genuine Enerpac cylinder, hose and manual, air or electric pump
- Sets are also available without hydraulics
- Bending shoes and bending frame are lightweight, heat-treated aluminium
- All sets include sturdy steel storage case
- All sets include BZ-12091 angle indicator for accurate bending
- BZ-12377 Shoe Lock Pin included in every set
- Eject-O-Matic™ benders (STB-202 models) have double-acting cylinder to eject pipe from the bending shoe

▲ Typical one shot bending operation.

Field-proven Tools feature “soft-grip” handles

ZU4-Series Electric Pumps

Specifically designed to operate with the most popular lines of stressing jacks, the ZU4-Series Pumps

have the features, performance and options that are required for use in post-tensioning markets.

Page: **86**

- “Soft-grip”, durable, field-proven designs, with ergonomic handles to help reduce operator fatigue
- Single-acting *PT* models, with spring-seating and optional power-seating are equipped with the new Enerpac RC Post-tensioning cylinders with a 254 mm stroke; ideal for slab-on-grade applications
- Double-acting *DPT* models have an 216 mm stroke and are machined from a steel billet; feature standard power-seating and “gun-drilled” internal hydraulic passages
- All jacks have a standard 3" nose assembly; 6" nose assemblies are available as accessories for all models
- A full line of grippers is available to tension $\frac{3}{8}$ ", $\frac{7}{16}$ ", $\frac{1}{2}$ " and .6" strand diameters
- Complete offering of Enerpac parts and soft kits allow quick and easy service

▼ Designed to be tough, the ZU4-Series with steel reservoirs will take the abuse of today's construction sites. The ZU4908JE is the ideal pump for post tensioning applications.

▼ SELECTION CHART

ENERPAC offers a comprehensive range of bolting tools suited to a wide variety of industries and applications.

Rigid steel and lightweight aluminium hydraulic torque wrenches and torque wrench pumps, nut splitters, flange spreaders and alignment tools...

Enerpac has the professional tools to complete your most difficult bolting jobs with the degree of safety and accuracy demanded in today's work environment.

Torque Wrench Pump Selection Matrix

For optimum speed and performance see the torque wrench and pump matrix.

Page: **206**

Torque Wrench Hoses

Use Enerpac THQ- and THC-Series hoses with double-acting torque wrenches to ensure the integrity of your hydraulic system.

Page: **206**

Hexagon Bolt and Nut Sizes

See the table for hexagon sizes of bolts, nuts and related thread diameters.

Page: **216**

Hydraulic Nut Splitters

▼ Shown from left to right: NC-3241, NC-1319, NC-1924

- Compact and ergonomic design, easy to use
- Unique angled head design
- Single-acting, spring return cylinder
- Heavy duty chisels can be reground
- Applications include service trucks, piping industry, tank cleaning, petrochemical, steel construction, mining, etc.

◀ Easily removing rusty nuts during railroad construction is just one of many application examples for the Enerpac Nut Splitter.

 Nut Splitters include a spare chisel, a spare set screw and the wrench used to secure the chisel. A CR-400 coupler is standard.

Hydraulic and mechanical Wedge Spreaders

ENERPAC
Hydraulic Technology Worldwide

▼ FSH-14 and FSM-8 with safety blocks SB-1

- For maintenance, commissioning, shutdowns, testing and valve change outs
- No need for hammers, chisels, slings or chainblocks
- Integrated wedge concept: Friction-free, smooth and parallel wedge movement eliminates flange damage and risk of spreading arm failure
- Unique interlocking wedge design - no first step bending and risk of slipping out of joint
- Requires very small access gap of only 6 mm
- Stepped spreader arm design - each step can spread under full load
- Few moving parts mean durability and low maintenance
- Safety block SB-1 and ratchet spanner SW-22 included with FSM-8 mechanical wedge spreader
- Safety block SB-1 and Enerpac RC-102 single-acting cylinder included with FSH-14 hydraulic wedge spreader

▼ Two FSH-14 spreaders used simultaneously with Enerpac handpump, hoses and AM-21 split-flow manifold.

FSH, FSM, STF Series

Tip Clearance / Maximum Spread*:

6 mm / 81 mm

Maximum Spread Force:

8 - 14 ton

Maximum Operating Pressure:

700 bar (FSH-14)

Stepped Blocks FSB-1

Use stepped blocks to increase wedge opening upto 81 mm. Fits both FSH-14 and FSM-8.

Split-Flow Manifolds

For simultaneously and even spreading of flange joints, 180° apart with FSH-14.

Page: 124

Tool and Pump Sets

The hydraulic flange spreader is available as set (pump, tool, gauge, gauge adaptor, couplers and hose) for your ordering convenience.

Spreader Modelnr.	Handpump Modelnr.	Set Model Number
FSH-14	P-392	STF-14H

Maximum Spreading Force ton (kN)	Model Number	Tip Clearance (mm)	Maximum Spread ¹⁾ (mm)	Spreader Type	Oil Capacity (cm ³)	Weight (kg)

8 (72)	FSM-8	6	81	Mechanical	—	6,5

¹⁾ Using stepped blocks FSB-1

* Available as pump-tool set, see note on this page.

Hydraulic and mechanical Flange Alignment Tools

▼ From left to right: **ATM-3**, **ATM-1**, **ATM-5** (shown without pump and hose)

ATM Series

Minimum Bolt Hole Size:

17 mm 11/16"

Flange Wall Thickness:

17 - 203 mm 11/16 - 8"

Maximum Lifting Force:

0,3 - 5 ton

Adjustable reach on ATM-3

The highly adjustable reach of the wing, the reversible lift hook and manual torque wrench **TW-22** allow precise alignment.

ATM-5 including hydraulics

Including 700 bar hydraulics: RC-53 single-acting cylinder, P-142 two-speed hand pump and 1,8 meters long safety

hose (HC-7206C).

- Rectifies twist and rotational misalignment without additional stress in pipe lines
- For most commonly used ANSI, API, BS and DIN flanges
- No slings, hooks, or lifting gear. Extremely safe, high precision
- **ATM-1** supplied with three bushings for different bolt hole sizes. Can be used in reversed position
- **ATM-3** fits on the following flanges:
 - Ring Type Joints: flange wall thickness min 30 - max 100mm
 - Gasket Type Joints: flange wall thickness min 25 - max 115mm
- **ATM-5** Fits when flange joint is:
 - between 93 - 228 mm [3.75 - 9 inch] apart and
 - bolt hole size 31,5 mm [1.25 inch] or greater
- Can be installed and used in any position and any location
- Stays stable in position under full load

▼ The Enerpac ATM-3 used to align a large ANSI flange.

* At 700 bar maximum operating pressure.
ATM-5 weight including hydraulic cylinder. Total set weight 28,2 kg.

Square Drive Hydraulic Torque Wrenches

▼ From left to right: S3000, S6000, S1500

Simplicity

- 360° click-on, multi-position reaction arm
- Push button square drive release for quickly reversing the square drive for tightening or loosening
- Fine tooth ratchet prevents tool “lock-on”
- Single 360° hydraulic swivel manifold, complete with screw lock couplings, increases wrench and hose manoeuvrability.

Design

- Compact, high strength uni-body construction for a small operating radius
- Robust design with minimal parts enables easy on-site maintenance without special tools
- Lightweight, ergonomic design for easy handling and an easy fit, even in applications where access is limited
- Optimised strength-to-weight ratio
- Fast operation due to the large nut rotation per wrench cycle (35 degree rotation angle) and rapid return stroke.

Reliability

- All wrenches are nickel-plated for excellent corrosion protection and improved durability in harsh environments.

Accuracy

- Constant torque output provides high accuracy across the full stroke
- Uni-body construction ensures accuracy by reducing internal deflections.

Rigid Steel Design

The *Professional* Square Drive Solution

S-Series, Square Drive Wrenches

This product range has been designed using state-of-the-art CAD techniques to bring you the most advanced square drive torque wrench on the market.

To ensure that the tools you buy meet our own exacting requirements, during the design process every prototype was put through finite element stress analysis, photo-elastic modelling, rigorous cyclic testing and strain gauging.

Special design service

Should you have an application where it is not possible to use the standard range of tools, then we invite you to draw on our extensive experience in providing tailor-made solutions to problems involving bolted joints.

Optional Direct Allen-key Drives

Expanded versatility with a wide range of metric and imperial Allen-key drives for hexagon socket head cap screws.

Page: **192**

Torque Wrench Hoses

Use Enerpac THQ-700 Series torque wrench hoses with S-Series torque wrenches to ensure the integrity of your hydraulic system.

6 m long, 2 hoses	THQ-706T
12 m long, 2 hoses	THQ-712T

Double-acting Square Drive Hydraulic Torque Wrenches

Use only Heavy Duty Impact Sockets for power driven torquing equipment, according to ISO2725 and ISO1174; DIN 3129 and DIN 3121 or ASME-B107.2/1995.

S Series

Maximum Torque at 700 bar/10.000 psi:
34.079 Nm / 25.150 Ft.lbs

Square Drive Range:
3/4 - 2 1/2 inch

Nose Radius:
25,0 - 63,5 mm

Maximum Operating Pressure:
700 bar / 10.000 psi

Torque Wrench Pump Selection Matrix

For optimum speed and performance see the torque wrench and pump matrix.

Page: 206

The rigid steel design of S-Series torque wrenches guarantee durability, reliability and safety. These wrenches can be powered by the portable ZU4T-Series pumps. ►

▼ Shown: SQD-100-I

- Very high torque-to-weight ratio
- High speed, double-acting operation
- High degree of rotation angle for increased productivity
- Never-jam mechanism
- High repeatability, with accuracy $\pm 3\%$
- Slim nose radius and 360° swivel hose connection allow easier positioning in confined areas
- Few moving parts means durability and low maintenance
- Push-button drive release; no tools needed to reverse square or Allen-key drives for tightening or loosening
- Lock-ring couplers are standard
- Fully corrosion resistant material
- Storage case (included) protects from damage, water and dirt

Aluminium High Power Wrenches for Sockets or Allen-Keys

Swivel Hose Connection

All Enerpac torque wrenches feature lock-ring couplers with a 360° swivel connection to allow easy access in all

positions.

Select the Right Torque

Choose your Enerpac Torque Wrench using the untightening rule of thumb: Loosening torque equals about 250% of tightening torque.

27.000 Nm

Square Drive Range:
3/4 - 2 1/2 inch

Maximum Operating Pressure:
800 bar

Use only Heavy Duty Impact Sockets for power driven torquing equipment, according to ISO 2725 and ISO 1174; DIN 3129 and DIN 3121 or ASME-B107.2/1995.

Torque Wrench Pumps and Hoses

Enerpac system matched air and electric torque wrench pumps provide control to operate hydraulic torque wrenches.

Page: **206**

Hexagon Bolt and Nut Sizes

¹⁾ Determine maximum torque according to the bolt size and grade.

For
SQD Series

Maximum Torque at 800 bar/ 11.600 psi:

27.000 Nm / 19.900 Ft.lbs

Allen-Key Drive Range:

1/2 - 2 1/4 inch

Select the Right Torque

Choose your Enerpac Torque Wrench using the untightening rule of thumb: Loosening torque equals about 250% of tightening torque.

Page: **206**

Nut Splitters

Remove rusted or corroded nuts easily with Enerpac Nut Splitters. Capacities up to 75 mm hexagon nut.

Page: **186**

Hexagon Bolt and Nut Sizes

See the table for hexagon sizes of bolts, nuts and related thread diameters.

Page: **216**

▼ SQD-100-I with RAH-100 Reaction Arm and Allen-key drive used for loosening hexagon socket head cap screws.

W-Series, Low Profile Hexagon Wrenches

▼ Shown: Drive units with interchangeable cassettes

Simplicity

- No tools are needed for changing the hexagon cassettes
- Innovative, pinless wrench construction incorporates quick release cylinder and automatic crank engagement
- Single 360° hydraulic swivel manifold complete with screw lock couplings increases wrench and hose manoeuvrability.

Design

- Cylinders and low profile cassettes have been engineered to give ultra slim, compact low clearance tooling with a small nose radius
- Robust design with minimal parts enables easy on-site maintenance without special tools
- Nut sizes covered range from 1^{1/4} - 4^{5/8} inch AF (30 – 115 mm)
- Optimized strength-to-weight ratio
- Fast operation due to the large nut rotation per wrench cycle (30 degree rotation angle) and rapid return stroke

Reliability

- All wrenches are nickel-plated for excellent corrosion protection and improved durability in harsh environments
- All wrenches are fitted with bronze bushings to ensure the ratchet will never seize in the sideplates, thus eliminating costly repairs

Accuracy

- Constant torque output provides high accuracy across the full stroke
- In-line reaction foot ensures accuracy by reducing internal deflections.

Rigid Steel Design

The *Professional* Low Profile Solution

W-Series, Low Profile Torque Wrenches

This product range has been designed using state-of-the-art CAD techniques to bring you the most advanced low profile torque wrench on the market. Safety, quality, toughness and reliability are built in.

During the design process every prototype was put through finite element stress analysis, photo-elastic modelling, rigorous cyclic testing and strain gauging.

Special Design Service

Should you have an application where it is not possible to use the standard range of tools, then we invite you to draw on our extensive experience in providing tailor-made solutions to problems involving bolted joints.

Versatility

- Quick Release interchangeable low profile hexagon cassettes
- One drive unit per size

(range) can be used to drive any hexagon within that range.

Torque Wrench Hoses

Use Enerpac THQ-700 Series hoses with W-Series torque wrenches to ensure the integrity of your hydraulic system.

6 m long, 2 hoses	THQ-706T
12 m long, 2 hoses	THQ-712T

Double-Acting Hydraulic Hexagon Torque Wrenches

Hexagon Cassettes and Reducer Inserts

Maximum versatility with the full range of interchangeable hexagon cassettes and hexagon reducing inserts is available in metric and inch sizes.

Page: 200

W Series

Maximum Torque at 700 bar / 10.000 psi:
20.337 Nm/15.000 Ft.lbs

Hexagon Range:
30-115 mm/1¹/₄ - 4⁵/₈ inch

Nose Radius:
31,0 - 87,5 mm

Maximum Operating Pressure:
700 bar / 10.000 psi

DRIVE UNIT AND INTERCHANGEABLE CASSETTE SELECTION

1) Additional Reducer Insert is hexagon size 2¹⁵/₁₆ - 2³/₁₆ inch, Modelnr. W4215R203, fits in W4215 hexagon cassette.

2) Additional Reducer Insert is hexagon size 2¹⁵/₁₆ - 2³/₁₆ inch Modelnr. W8215R203, fits in W8215 hexagon cassette.

3) Additional Reducer Insert is hexagon size 3³/₄ - 2³/₄ inch Modelnr. W8312R212, fits in W8312 hexagon cassette.

See the table of hexagon bolt and nut sizes and related thread diameters on page 216.

HXD-Series, Hexagon Cassette Wrenches

ENERPAC 
Hydraulic Technology Worldwide

▼ Shown from left to right: HXD-60 with CC-680, HXD-30 with CC-360

- High torque-to-weight ratio, slim nose radius and flat design
- High speed, high degree of rotation angle, double-acting
- Snap in, interchangeable cassettes, no tools required
- 360° swivel hose connection allows easier positioning in confined areas
- Lock-ring couplers are standard
- High repeatability, with accuracy $\pm 3\%$
- Strong unibody design, integrated reaction arm and few moving parts make wrenches durable and reliable
- Extensive range of metric and imperial hexagon cassettes and reducers
- Fully corrosion resistant material
- Drive unit and cassette come in storage case to protect from damage, water and dirt

▼ The HXD-30 drive unit combined with cassette CC-360 is the best solution for this turbine application. The slim nose radius and swivel couplers allow easy access in all positions.

Aluminium Design, Low Profile and Slim Nose Radius

Select the Right Torque

Choose your Enerpac Torque Wrench using the untightening rule of thumb: Loosening torque equals about 250% of tightening torque.

Page: **206**

Hexagon Bolt and Nut Sizes

See the table for hexagon sizes of bolts, nuts and related thread diameters.

Page: **216**

Nut Splitters

Remove rusted or corroded nuts easily with Enerpac Nut Splitters. Capacities up to 75 mm hexagon nut.

Page: **186**

▼ An Enerpac hydraulic wrench brings safety and economy to all kinds of maintenance jobs.

Double-Acting Hydraulic Torque Wrenches

▼ Shown from left to right: CC-360, HXD-30

TORQUE WRENCH SELECTION IN 2 STEPS:

- 1 DRIVE UNIT**
Select the HXD-Drive Unit using the quick selection chart below.
- 2 CASSETTE**
Select the appropriate CC-Cassette from the pages 204 and 205.

HXD Series

Maximum Torque:
24.210 Nm

Hexagon Range:
30 - 130 mm

Nose Radius:
28,5 - 96,0 mm

Maximum Operating Pressure:
800 bar

DRIVE UNIT AND INTERCHANGEABLE CASSETTE SELECTION

Reducer Inserts

Expanded versatility with the full range of metric and imperial Reducer Inserts and Holding Rings.

Page: **204**

Torque Wrench Pump Selection Matrix

For optimum speed and performance see the torque wrench and pump matrix.

Page: **206**

Select the right torque

Choose your Enerpac torque wrench using the untightening rule of thumb:

- Be aware that when loosening a nut or bolt more torque is usually required than when tightening.
- Do not apply more than 75% of the maximum torque when loosening nuts or bolts.

Conditions of bolted joints

- For fully threaded UNC nuts and bolts do not exceed **1½ times** nominal torque for a friction coefficient of 0,1.
- Humidity corrosion (rust) requires up to **2 times** the torque required for tightening.
- Sea water and chemical corrosion requires up to **2½ times** the torque required for tightening.
- Heat corrosion requires up to **3 times** the torque required for tightening.

Torque Wrench Couplers

Refer to the System Components section for ordering couplers for torque wrenches.

Page: 120

IMPORTANT!

Always make sure that the torque scale on the pump matches the torque wrench size for accurate torque settings.

Portable Electric Torque Wrench Pumps

ENERPAC 
Hydraulic Technology Worldwide

▼ PMU-10422

**PME,
PMU
Series**

Reservoir Capacity:

3,0 litres

Flow at Rated Pressure:

0,34 l/min

Motor Size:

0,37 kW

Maximum Operating Pressure:

700 and 800 bar

- Powerful two-speed pump is lightweight and easy to carry
- Standard heat exchanger package on PMU-Series keeps the oil cool under extreme use
- Glycerine filled gauge with scale reading in bar and psi
- Transparent overlays in Nm and Ft.lbs for Enerpac torque wrenches provide a quick torque reference
- Universal motor for a high power-to-weight ratio;
- Adjustable pressure relief valve for accurate torque adjustments and precise repeatability.

▼ The lightweight PMU-10422 makes work on remote locations easy.

Oil Flow Rate (l/min)		Maximum Pressure Rating (bar)		Model Number	Model Number with Heat Exchanger ¹⁾	Usable Oil Capacity (litres)	Motor Electrical Specifications (Amps-Volts-Ph-Hz)	Motor Size (kW)	Outside Dimensions L x W x H (mm)	 (kg)

¹⁾ PMU pump with heat exchanger weights 24 kg.

Portable Electric Torque Wrench Pumps

▼ PTE-3404W

- Two stage pump with automatic integrated bypass for faster torque cycles
- Submerged motor for low noise and reduced heat build up
- Glycerine-filled pressure gauge with scale reading in bar/psi
- Transparent overlays in Nm and Ft.lbs, included for Enerpac torque wrenches produce accurate torque settings and precise repeatability
- Customer adjustable pressure relief valve
- Integrated motor disconnect switch and compact ergonomic design.

PTE Series

Reservoir Capacity:

3,8 litres

Flow at Rated Pressure:

0,7 - 0,9 l/min

Motor Size:

1,5 - 1,8 kW

Maximum Operating Pressure:

700 and 800 bar

Torque Wrench Pump Selection Matrix

For optimum speed and performance see the torque wrench, pump and hose matrix.

Page: **206**

Transparent Overlays

Transparent torque overlays in Nm and Ft.lbs for Enerpac torque wrenches are included with most Enerpac torque wrench pumps.

ZU4T-Series, Electric Torque Wrench Pumps

ENERPAC 
Hydraulic Technology Worldwide

▼ ZU4204TE-EHK (shown with optional heat exchanger and skidbar)

- Can be used with any brand of 700 or 800 bar single- and double-acting hydraulic torque wrenches
- LCD provides self test, diagnostic and read-out capabilities
- Auto cycle feature provides continuous cycle operation as long as the advance button is pressed (pump can be used with or without auto cycle feature)
- Available with 4-wrench manifold for simultaneous operation of multiple torque wrenches
- Powerful 1,25 kW universal electric motor provides high power-to-weight ratio
- High-strength, moulded composite shroud protects motor and electronics, while providing an ergonomic, non-conductive handle for easy transport

ZU4 CLASS

Tough, Dependable and Innovative

Back-lit LCD and Pressure Transducer

- Digital read-out and "Autocycle" setting
- Pump usage information, hour and cycle counts
- Low-voltage warning and recording
- Self-test and diagnostic capabilities
- Information can be displayed in English, French, German, Italian, Spanish and Portuguese
- Pressure transducer is more accurate and durable than analog gauges
- Easy-viewing variable rate display
- Display pressure in bar, MPa or psi.

▼ Any brand of hydraulic torque wrench can be powered by the portable ZU4T-Series torque wrench pump.

Hydraulic Torque Wrench Pumps

ZU4T-Series Pump Applications

The ZU4T-Series pump is best suited to power medium to large size torque wrenches or hydraulic tools, or wherever high speed, intermittent duty cycle is needed.

Patent-pending **Z-Class** technology provides high by-pass pressures for increased productivity. Its high power to weight ratio and compact design

make it ideal for applications which require easy transport of the pump. It utilizes a universal motor which will work well on long extension cords or generator driven electrical power supplies.

For further application assistance contact your local Enerpac office.

ZU4T Series

Reservoir Capacity:

4 and 8 litres

Flow at Rated Pressure:

0,9 - 1,0 l/min

Motor Size:

1,25 kW

Maximum Operating Pressure:

700 and 800 bar

Torque Wrench Pump Selection Matrix

For optimum speed and performance see the torque wrench, pump and hose selection matrix.

Page: **206**

▼ SELECTION CHART

BASIC PUMP TYPES For technical information see options and specifications: Page: 212	Pump Type	Maximum Operating Pressure (bar)	Motor Voltage (1,25 kW)	Usable Oil Capacity (litres)	Model Number ¹⁾	 ²⁾ (kg)
800 bar Pumps for Enerpac SQD and HXD-Series torque wrenches - Ideal for bolting applications that require remote pump and valve operation. - Motor on/off and valve control in pendant. Pressing up arrow advances wrench, releasing up arrow retracts wrench (auto cycle off). - Low-voltage control pendant with 6m cord for remote motor and valve operation.		800	115 V / 1ph	4,0	ZU4204TB-E	32
		800	115 V / 1ph	8,0	ZU4208TB-E	36
		800	230 V / 1ph	4,0	ZU4204TE-E	32
		800	230 V / 1ph	8,0	ZU4208TE-E	36
700 bar Pumps for all Enerpac S and W-Series and other brands of torque wrenches - Ideal for bolting applications that require remote pump and valve operation. - Motor on/off and valve control in pendant. Pressing up arrow advances wrench, releasing up arrow retracts wrench (auto cycle off). - Low-voltage control pendant with 6m cord for remote motor and valve operation.		700	115 V / 1ph	4,0	ZU4204TB-Q	32
		700	115 V / 1ph	8,0	ZU4208TB-Q	36
		700	230 V / 1ph	4,0	ZU4204TE-Q	32
		700	230 V / 1ph	8,0	ZU4208TE-Q	36

¹⁾ All models meet CE safety requirements and all CSA requirements.

²⁾ Subtract 1 kg per litre oil for competitive weight comparison.

ZU4T-Series, Torque Wrench Pump Options

Skidbar

- Provides greater pump stability on soft or uneven surfaces, and easy two-hand lift.

Accessory Kit Nr. *	Can be used on ZU4T-Series torque wrench pumps
SBZ-4	4 and 8 litres reservoir

* Add suffix **K** for factory installation. Skidbar weight 2,2 kg.

4-Wrench Manifold

- For simultaneous operation of multiple torque wrenches
- Can be factory installed or ordered separately.

Accessory Kit Nr. *	Can be used on ZU4T-Series torque wrench pumps
ZTM-UE	for 800 bar torque wrenches
ZTM-U4Q	for 700 bar torque wrenches

* Add suffix **M** for factory installation.

Heat Exchanger ²⁾

- Removes heat from the bypass oil to provide cooler operation
- Stabilizes oil viscosity, increasing oil life and reduces wear of pump and other hydraulic components.

²⁾ Add suffix **H** for factory installation. Heat Exchanger adds 4,1 kg to pump weight.

Thermal Transfer *		Max. pressure	Max. oil flow	Voltage
Btu/h	kJoule	(bar)	(l/min)	(VDC)
900	950	20,7	26,5	12

* At 1,9 l/min at 21 °C ambient temperature.

Do not exceed maximum oil flow and pressure ratings. Heat exchanger is not suitable for water-glycol or high water based fluids.

◀ Any hydraulic torque wrench can be powered by the Enerpac ZU4T-Series torque wrench pump.

How to order your ZU4T-Series torque wrench pump

Ordering Example 1

Model Nr. ZU4204TE-EHK

800 bar pump for use with Enerpac HXD and SQD-Series or other 800 bar torque wrenches, 230V motor, 4 litres reservoir, optional heat exchanger and skidbar.

Ordering Example 2

Model Nr. ZU4208TB-QMHK

700 bar pump for use with Enerpac S and W-Series and other 700 bar torque wrenches, 115V motor, 8 litres reservoir, 4 wrench manifold, heat exchanger and skidbar.

Refer to the torque wrench pump selection matrix for optimum wrench, pump and hose combinations.

Air Driven Torque Wrench Pumps

▼ PTA-1404

PTA Series

Reservoir Capacity:

3,8 - 8,0 litres

Flow at Rated Pressure:

0,3 - 0,5 l/min

Air Consumption:

1130 - 1840 l/min

Maximum Operating Pressure:

700 and 800 bar

- Two-stage pump with automatic bypass for faster torque cycles
- Remote pendant with safety button for one-man operation
- Adjustable pressure relief valve for accurate torque adjustment and precise repeatability
- Transparent overlays in Nm and Ft.lbs, included for Enerpac torque wrenches produce accurate torque settings and precise repeatability
- Glycerine filled pressure gauge with scale reading in bar/psi
- Regulator-Filter-Lubricator provides clean, lubricated air and allows for air pressure adjustment. Steel bowl guards are standard
- 4,5 m air pendant enables easy manoeuvring at the job site
- With carrying handle for easy portability.

▼ Enerpac PTA-3408 Torque Wrench Pump and the aluminium HXD-120 torque wrench are used to perform maintenance on an injection moulding press.

Oil Flow Rate (l/min)		Maximum Pressure Rating (bar)		Model Number	Usable Oil Capacity (litres)	Air Consumption at 7 bar air @3000 RPM (l/min)	Air Pressure Range (bar)	Motor Size (kW)	Outside Dimensions L x W x H (mm)	 (kg)
1st stage	2nd stage	1st stage	2nd stage							
3,30	0,33	120	700	PTA-1404-Q	2,0	1130	3,4 - 7,0	1,1	496 x 310 x 449	24

High Flow Air Driven Torque Wrench Pump

▼ PMA-62480

PMA Series

Reservoir Capacity:

8 litres

Flow at Rated Pressure:

1,8 l/min

Air Consumption:

3900 l/min

Maximum Operating Pressure:

700 and 800 bar

- High-output air driven two-stage pump
- For hazardous environments where explosion proof pumps are required
- Adjustable pressure relief valve for accurate torque adjustment and precise repeatability
- Internal safety relief valve prevents accidental over-pressurization
- Glycerine filled pressure gauge with scale reading in bar/psi
- Air operated valve with remote control pendant
- With carrying handles for easy portability
- Heavy duty heat exchanger available; contact Enerpac

Torque Wrench Pump Selection Matrix

For optimum speed and performance see the torque wrench, pump and hose matrix.

Page: 206

For hazardous environments where explosion proof pumps are required the air driven PMA-Series torque wrench pump is the solution. ►

Oil Flow Rate (l/min)		Maximum Pressure Rating (bar)		Model Number	Usable Oil Capacity (litres)	Air Consumption at 8 bar air @ 3000 RPM (l/min)	Air Pressure Range (bar)	Motor Size (kW)	Outside Dimensions L x W x H (mm)	Weight (kg)
1st stage	2nd stage	1st stage	2nd stage

11,0	1,8	145	800	PMA-62480	7,5	3900	4 - 7	3,0	305x205x330	38

Hexagon Bolt and Nut Sizes

Determine the maximum torque according to the bolt (nut) size and grade. Always consult the manufacturers instructions or engineering recommendations when making bolted connections.

IMPORTANT

The hexagon sizes shown in the tables below should be used as a guide only. Individual sizes should be checked before specifying any equipment.

METRIC SIZES

		
Hexagon Size S (mm)	Thread Size D (mm)	Hexagon Size J (mm)
17	M 10	8

4 ¹ / ₄ "	2 ³ / ₄ "	2"
4 ⁵ / ₈ "	3"	2 ¹ / ₄ "
5"	3 ¹ / ₄ "	2 ¹ / ₄ "

Use only Heavy Duty Impact Sockets for power driven torquing equipment, according to ISO 2725 and ISO 1174; DIN 3129 and DIN 3121 or ASME-B107.2/1995.

Always make sure that the gauge template on the pump matches the torque wrench for accurate torque settings.

Torque Wrench Pump Selection Matrix

For optimum speed and performance see the torque wrench, pump and hose matrix.

New: High pressure hydraulic systems in structural engineering

The brochure shows a multitude of applications of Enerpac 700 bar hydraulics in Bridge and Structural Engineering projects around the world. Clearly describing the system-technology and tools used in these projects. To obtain your copy just give us a call, or visit our Internet site www.enerpac.com

New: Workholding catalog primarily providing solutions for the machining and machine tool industry and for workpiece holding applications in many other industries.

While every care has been taken in the preparation of this catalog and all data contained within is deemed accurate at the time of printing, Enerpac does reserve the right to make changes to the specifications of any product, or discontinue any product, contained within this catalog without prior notice.

All illustrations, performance specifications, weights and dimensions reflect the nominal values and slight variations may occur due to manufacturing tolerances. Please consult Enerpac if final dimensions are critical. All information in this catalog can be changed due to product improvements without prior notice.

© Copyright 2006, Enerpac.
All rights reserved. Any copying or other use of material in this catalog (text, illustrations, drawings, photo's) without express written consent is prohibited.

World Wide Catalog Coverage

Enerpac Catalogs are printed in many languages. If your requirements call for product use in a different country, please send your request to the applicable country listed on **page 218** or www.enerpac.com – the Enerpac catalog of the country serving your specific market area will be forwarded promptly.
